How to Reach Us

Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are available in print or electronic format. Maps and other geographic reference materials are available for some types of data. In some cases, workshops and seminars have been developed to provide additional information on some subjects.

How to Obtain More Information

Inquiries about products and services should be directed to your local Statistics Canada Reference Centre:

St. John's	(709) 772-4073	Winnipeg	(204) 983-4020
Halifax	(902) 426-5331	Regina	(306) 780-5405
Montréal	(514) 283-5725	Edmonton	(403) 495-3027
Ottawa	(613) 951-8116	Calgary	(403) 292-6717
Toronto	(416) 973-6586	Vancouver	(604) 666-3691

For users who reside outside the local dialing area of the Regional Reference Centres, a toll-free number is provided:

How to Order Products

Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the nearest Statistics Canada Regional Reference Centre, or by mail order from Publication Sales, Statistics Canada, Ottawa K1A 0T6. Contact the nearest Statistics Canada Regional Reference Centre for more information on electronic products and services. See the order form at the end of this product for further details.

Pour nous joindre

Des données sous plusieurs formes...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations normalisées et spéciales sont disponibles sur support papier ou électronique. Des cartes et d'autres documents géographiques de référence sont disponibles pour certains genres de données. Dans certains cas, des ateliers et des séminaires procurent des renseignements complémentaires sur certains sujets.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet des produits et services doivent être adressées au centre de consultation de Statistique Canada de votre région :

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the population of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Preface

This publication is part of The Nation series, a collection of 24 reports containing basic information on a broad range of questions from the 1991 Census of population.

The first four publications in the series present data which were collected from every household in Canada. These data concern demographic, family, household, dwelling, and mother tongue characteristics. The remaining 20 publications contain data collected from a 20% sample of households, and include statistics on demographic, social, cultural and economic characteristics. The geographic coverage in these publications is primarily at the national, provincial and territorial levels, although some data are provided for large metropolitan areas.

Additional statistics on the subjects covered in these publications will be available in other data products, such as the Profiles series, the Dimensions series, Aboriginal Peoples products, Basic Summary Tabulations and Public Use Microdata Files. Together, the products and services from the 1991 Census provide a complete set of current information about Canada and Canadians.

I would like to express my appreciation to the millions of Canadians who completed their questionnaires on June 4, 1991, as well as to all those who assisted Statistics Canada in planning and conducting the census.

Ivan P. Fellegi
Chief Statistician of Canada

Préface

La présente publication fait partie de la série «Le pays» qui comprend 24 bulletins dans lesquels se retrouvent des renseignements de base sur un large éventail de questions posées au recensement de la population de 1991.

Les quatre premières publications de la série présentent les données qui ont été recueillies auprès de tous les ménages du Canada. Ces données portent sur des caractéristiques relatives à la démographie, à la famille, au ménage, au logement et à la langue maternelle. Les 20 autres publications contiennent des données recueillies auprès d'un échantillon formé de 20 % des ménages et renferment des statistiques sur des caractéristiques démographiques, sociales, culturelles et économiques. Ces publications présentent surtout des données à l'échelle du Canada, des provinces et des territoires, mais on y trouve également certaines données pour les grandes régions métropolitaines.

Des statistiques supplémentaires sur les sujets traités dans ces publications seront disponibles dans d'autres produits de données tels que les séries «Profils» et «Dimensions», les produits sur les autochtones, les tableaux sommaires de base et les fichiers de microdonnées à grande diffusion. Ensemble, les produits et services du recensement de 1991 procurent des informations récentes et complètes sur le Canada et sa population.

J'aimerais exprimer ma reconnaissance aux millions de Canadiens et Canadiennes qui ont rempli leurs questionnaires le 4 juin 1991 et à tous ceux et celles qui nous ont prêté leur concours en travaillant à la planification et à la réalisation du recensement.

Le statisticien en chef du Canada
Ivan P. Fellegi

Highlights

Total Income

- While the total population increased by 7.9%, the number of income recipients increased by 13.5% from 17.1 million in 1985 to 19.4 million in 1990. The number of male recipients increased by 10.3% and that of females by 16.9%.
- After adjustment for inflation, the average income of individuals 15 years and over increased by 6% from \$22,640 in 1985 to \$24,001 in 1990. The average income of males increased by 4.3% to \$30,205 in 1990, whereas the average income of females increased by 11.9% to \$17,577 in 1990.
- Between 1985 and 1990, changes in the average income of individuals in the provinces and territories ranged from a drop of 1.5% in Saskatchewan to an increase of 11.7% in Prince Edward Island.
- Beginning at \$4,808 for males aged 15 to 19 years, the average income of men increased by age to a peak of \$41,368 in the 45-54-year age group and then declined to \$22,643 for males aged 70 years and over.
- Female average income followed a similar pattern, beginning at \$4,084 for the 15-19-year age group. However, because their peak average income at \$22,238 in the 35-44-year age group was much lower than that of males, the rise and fall in their income with age was much less pronounced.
- Overall, about 5.4 million or 27.7% of all income recipients received a total income of less than \$10,000 in 1990. Of these 36.2% were males and 63.8% were females.
- About 3.3 million or 16.9% of all income recipients received a total income of \$40,000 or more in 1990. Of these, 78.1% were men and 21.9% were women.

Employment Income

(a) All Employment Income Recipients

- Between 1985 and 1990, the number of individuals 15 years and over with employment income (that is, wages and salaries and income from farm or non-farm self-employment) increased by 14.0%. While the number of male earners increased by 9.7%, that of female earners increased by 19.6%.
- After adjustment for inflation, the overall average employment income increased by 4.3% from \$23,319 in 1985 to \$24,329 in 1990. The average earnings of men increased by 3.2% to \$29,847, while women's average earnings rose by 10.6% to \$17,751.

Faits saillants

Revenu total

- Tandis que la population totale augmentait de 7,9 %, le nombre de bénéficiaires d'un revenu s'est accru de 13,5 %, pour passer de 17,1 millions en 1985 à 19,4 millions en 1990. Le nombre de bénéficiaires a augmenté de 10,3 % chez les hommes et de 16,9 % chez les femmes.
- Après ajustement en fonction de l'inflation, le revenu moyen des particuliers de 15 ans et plus a augmenté de 6 %, pour passer de 22 640 \$ en 1985 à 24 001 \$ en 1990. Le revenu moyen des hommes s'est accru de 4,3 %, pour atteindre 30 205 \$ en 1990, tandis qu'il a augmenté de 11,9 % chez les femmes, pour passer à 17 577 \$ en 1990.
- De 1985 à 1990, les variations observées dans le revenu moyen des particuliers selon les provinces et les territoires allaient d'une diminution de 1,5 % en Saskatchewan à une augmentation de 11,7 % à l'Île-du-Prince-Édouard.
- De 4 808 \$ chez les hommes de 15 à 19 ans, le revenu moyen des hommes augmentait avec l'âge, pour atteindre 41 368 \$ chez les 45 à 54 ans. Il diminuait ensuite, pour passer à 22 643 \$ chez les hommes de 70 ans et plus.
- Le revenu moyen des femmes suivait une tendance semblable : il était de 4 084 \$ chez les femmes de 15 à 19 ans. Cependant, comme le revenu moyen le plus élevé (22 238 \$ chez les femmes de 35 à 44 ans) était de beaucoup inférieur à celui des hommes, les hausses et les baisses de leur revenu selon l'âge étaient beaucoup moins accentuées.
- Dans l'ensemble, environ 5,4 millions, soit 27,7 % de tous les bénéficiaires d'un revenu, avaient un revenu total de moins de 10 000 \$ en 1990; 36,2 % étaient des hommes et 63,8 % étaient des femmes.
- Environ 3,3 millions de tous les bénéficiaires d'un revenu, soit 16,9 %, ont eu un revenu total de 40 000 \$ ou plus en 1990; 78,1 % étaient des hommes et 21,9 % étaient des femmes.

Revenu d'emploi

a) Tous les bénéficiaires d'un revenu d'emploi

- De 1985 à 1990, le nombre de personnes de 15 ans et plus ayant eu un revenu d'emploi (c'est-à-dire des salaires et traitements et un revenu de travail autonome agricole et non agricole) s'est accru de 14,0 %. Alors que le nombre d'hommes bénéficiaires d'un revenu a augmenté de 9,7 %, celui des femmes s'est accru de 19,6 %.
- Après ajustement en fonction de l'inflation, le revenu moyen d'emploi s'est accru dans l'ensemble de 4,3 %, pour passer de 23 319 \$ en 1985 à 24 329 \$ en 1990. Les gains moyens chez les hommes ont augmenté de 3,2 %, pour atteindre 29 847 \$, alors qu'ils ont augmenté de 10,6 % chez les femmes, pour passer à 17 751 \$.

- Between 1985 and 1990, the change in inflation-adjusted average employment income of individuals in various provinces and territories differed substantially. Average earnings fell by 3.9% in Saskatchewan and by 1.2% in Alberta; they rose by 9.7% in the Yukon and by 9.3% in Prince Edward Island.
- Overall, about 4.2 million or 28.3% of all employment income recipients received a total employment income of less than \$10,000 in 1990. Of these 41.8% were males and 58.2% were females.
- About 2.7 million or 18.2% of all employment income recipients received a total employment income of \$40,000 or more in 1990. Of these, 80.5% were men and 19.5% were women.

(b) Full-year, Full-time Workers

- Of the 14.9 million individuals who reported employment income for 1990, 51.8% worked full year, full time (49 to 52 weeks in 1985 or 1990, mostly full time). While the number of men who worked full year, full time increased by 11%, the increase for women was significantly higher at 29%. Consequently, the proportion of women among all full-year, full-time workers increased from 35% in 1985 to 39% in 1990.
- Compared with \$33,337 in 1985, the average earnings of full-year, full-time workers were \$33,714 in 1990, a gain of only 1.1% in the five years. Average earnings of women increased by 4.6% to \$26,033 in 1990 compared with a 1.8% increase to \$38,648 for men.
- For full-year, full-time workers, the ratio of female to male average earnings rose from 65.5% in 1985 to 67.4% in 1990. The earnings gap varied substantially by different characteristics. For example, the female to male earnings ratio in the 15-to-24 age groups was 83.7% and declined with age to 60.6% for the 55-64 age group. Among single (never married) persons, average earnings of women were 91.3% of men, while the ratio between the earnings of married women and men was 63.1%.

Wages and Salaries

- After adjustment for inflation, the overall average wages and salaries of all paid workers increased by 4.5% from \$23,210 in 1985 to \$24,259 in 1990. While the real wages and salaries of women increased by 10.7% to \$17,933, those of men increased by only 2.9% to \$29,757.

- De 1985 à 1990, la variation du revenu moyen d'emploi des particuliers, ajusté en fonction de l'inflation, différait considérablement selon les provinces et les territoires. Les gains moyens ont diminué de 3,9 % en Saskatchewan et de 1,2 % en Alberta; ils ont augmenté de 9,7 % au Yukon et de 9,3 % à l'Île-du-Prince-Édouard.
- Dans l'ensemble, environ 4,2 millions, soit 28,3 %, de tous les bénéficiaires d'un revenu d'emploi ont eu un revenu total d'emploi de moins de 10 000 \$ en 1990; 41,8 % étaient des hommes et 58,2 % étaient des femmes.
- Environ, 2,7 millions, soit 18,2 %, de tous les bénéficiaires d'un revenu d'emploi ont eu un revenu total d'emploi de 40 000 \$ ou plus en 1990; 80,5 % étaient des hommes et 19,5 % étaient des femmes.

b) Travailleurs à plein temps toute l'année

- Parmi les 14,9 millions de personnes qui ont déclaré un revenu d'emploi en 1990, 51,8 % ont travaillé à plein temps toute l'année (de 49 à 52 semaines en 1985 ou en 1990, surtout à plein temps). Tandis que le nombre d'hommes ayant travaillé à plein temps toute l'année a augmenté de 11 %, l'augmentation chez les femmes a été considérablement plus élevée (29 %). Par conséquent, la proportion de femmes parmi les travailleurs à plein temps toute l'année a augmenté, de 35 % en 1985 à 39 % en 1990.
- De 33 337 \$ en 1985, les gains moyens des travailleurs à plein temps toute l'année étaient de 33 714 \$ en 1990, une augmentation de seulement 1,1 % en cinq ans. Les gains moyens des femmes ont augmenté de 4,6 %, pour passer à 26 033 \$ en 1990, comparativement à une augmentation de 1,8 % chez les hommes, laquelle faisait passer leurs gains à 38 648 \$.
- Chez les travailleurs à plein temps toute l'année, le rapport entre les gains moyens des femmes et ceux des hommes s'est accru, de 65,5 % en 1985 à 67,4 % en 1990. L'écart entre les gains variait considérablement selon diverses caractéristiques. Ainsi, le rapport entre les gains des femmes et ceux des hommes chez les 15 à 24 ans était de 83,7 %, puis diminuait avec l'âge, à 60,6 % chez les 55 à 64 ans. Parmi les célibataires (jamais mariés), les gains moyens des femmes étaient de 91,3 % de ceux des hommes, tandis que le rapport entre les gains était de 63,1 % chez les femmes et les hommes mariés.

Salaires et traitements

- Après ajustement en fonction de l'inflation, l'ensemble des salaires et traitements moyens de tous les travailleurs rémunérés s'est accru de 4,5 %, de 23 210 \$ en 1985 à 24 259 \$ en 1990. Tandis que les salaires et traitements réels des femmes ont augmenté de 10,7 %, pour passer à 17 933 \$, ceux des hommes se sont accrus de seulement 2,9 %, pour atteindre 29 757 \$.

Family Income

- After adjustment for inflation, average family income increased by 9.0% from \$47,087 in 1985 to \$51,342 in 1990. While the average income of husband-wife families increased by 9.2% to \$54,667, that of female lone-parent families increased by 11.2% to \$26,550 and that of male lone-parent families increased by 4.9% to \$40,792 in 1990.
- The proportion of families with a total income of \$80,000 or more increased from 11.3% in 1985 to 14.6% in 1990.
- Compared with 11.7% of husband-wife families and 23.7% of male lone-parent families, 47% of female lone-parent families had an income of less than \$20,000 in 1990.
- Between 1985 and 1990, the three Prairie provinces experienced the smallest increase, between 2% and 4%, in average family income, while families in Nova Scotia and Quebec gained 7% to 8%. In all other provinces and territories, average family income increased between 10% and 14%.
- In 1985, in 55.1% of all husband-wife families both husbands and wives reported earnings. In 1990, the proportion of such families increased to 61.9%. Their average family income, at \$63,451, was 57.1% higher than that of all other husband-wife families.
- Compared with 11% of male lone-parent families, 24.4% of female lone-parent families had no employment income recipient. For both male and female lone-parent families, the average family income of those with employment income was about three times larger than of those with no employment income.

Household income

- After adjustment for inflation, the average income of all private households increased by 8.2% from \$42,648 in 1985 to \$46,137 in 1990.
- Between 1985 and 1990, the largest increase in inflation-adjusted average household income occurred in the Yukon (14.0%) and British Columbia (12.5%). Average household income increased the least in Saskatchewan (1.0%) and Manitoba and Alberta (3.2%).
- Of all private households, 22.8% contained one person and 31.4% contained only two persons. Less than 11% of all households had five or more persons. Average household income increased by size of household from \$23,716 for one-person households to \$44,497 for two-person households and, finally, to \$69,244 for households with seven or more persons.

Revenu de la famille

- Après ajustement en fonction de l'inflation, le revenu moyen de la famille a augmenté de 9,0 %, pour passer de 47 087 \$ en 1985 à 51 342 \$ en 1990. Alors que le revenu moyen des familles époux-épouse a augmenté de 9,2 %, pour atteindre 54 667 \$, celui des familles monoparentales dont le parent est une femme s'est accru de 11,2 %, pour passer à 26 550 \$ et celui des familles monoparentales dont le parent est un homme s'est accru de 4,9 %, pour passer à 40 792 \$ en 1990.
- La proportion des familles ayant un revenu total de 80 000 \$ ou plus a augmenté, de 11,3 % en 1985 à 14,6 % en 1990.
- Comparativement à 11,7 % des familles époux-épouse et à 23,7 % des familles monoparentales dont le parent est un homme, 47 % des familles monoparentales dont le parent est une femme avaient un revenu de moins de 20 000 \$ en 1990.
- De 1985 à 1990, les trois provinces des Prairies ont connu les plus faibles augmentations du revenu moyen de la famille, de 2 % à 4 %, alors que les familles en Nouvelle-Écosse et au Québec ont connu des augmentations de 7 % ou 8 %. Dans les autres provinces et territoires, le revenu moyen de la famille s'est accru entre 10 % et 14 %.
- En 1985, dans 55,1 % de toutes les familles époux-épouse, l'époux et l'épouse avaient déclaré des gains. En 1990, leur proportion était passée à 61,9 %. Leur revenu moyen familial (63 451 \$) était 57,1 % plus élevé que celui de toutes les autres familles époux-épouse.
- Comparativement à 11 % dans les familles monoparentales dont le parent est un homme, 24,4 % des familles monoparentales dont le parent est une femme n'avait pas de bénéficiaires d'un revenu. Chez les familles monoparentales (hommes et femmes), le revenu moyen de la famille de ceux ayant un revenu d'emploi était trois fois plus élevé que ceux n'ayant pas de revenu d'emploi.

Revenu du ménage

- Après ajustement en fonction de l'inflation, le revenu moyen de tous les ménages privés a augmenté de 8,2 %, de 42 648 \$ en 1985 à 46 137 \$ en 1990.
- De 1985 à 1990, on observait la plus forte augmentation du revenu moyen des ménages, après ajustement en fonction de l'inflation, au Yukon (14,0 %) et en Colombie-Britannique (12,5 %). Le revenu moyen des ménages a connu les plus faibles augmentations en Saskatchewan (1,0 %), au Manitoba et en Alberta (3,2 %).
- Parmi tous les ménages privés, 22,8 % étaient formés d'une personne et 31,4 % de deux personnes. Moins de 11 % de tous les ménages comptaient cinq personnes ou plus. Le revenu moyen du ménage augmentait selon la taille du ménage, de 23 716 \$ dans les ménages d'une personne à 44 497 \$ dans les ménages de deux personnes, puis à 69 244 \$ dans les ménages de sept personnes ou plus.

Low Income

- The number of families below Statistics Canada's low income cut-offs decreased from 1,073,000 in 1985 to 973,000 in 1990. Thus, the incidence of low income among economic families declined from 15.9% in 1985 to 13.2% in 1990.
- In 1990, the incidence of low income was 9.3% in husband-wife families, 18.8% for male lone-parent families and 44.7% for female lone-parent families.
- The incidence was lowest in Prince Edward Island (10.3%), followed by Ontario (10.9%). It was highest in Quebec (16.2%), followed by Newfoundland (15.8%).
- Compared with 41.3% in 1985, the total income of 36.5% of all unattached individuals was below Statistics Canada's low income cut-offs in 1990. The incidence was 31.8% among male unattached individuals and 40.6% among female unattached individuals.
- Compared with 15.8% for all persons in private households, 19.8% of children under 6 and 16.9% of children 6 to 14 years were in low income families. The incidence of low income was 15.6% among persons 65 to 69 years and 20.8% among those 70 years and over.

Census Metropolitan Areas

- In 1990, average income of individuals was highest in Toronto (\$28,814), followed by Ottawa-Hull (\$28,396) and it was lowest in Sherbrooke (\$20,834), followed by Trois-Rivières (\$21,293).
- Adjusted for inflation, average income of all individuals increased, between 1985 and 1990 in 21 Census Metropolitan Areas (CMAs). These increases ranged from less than 1% in Winnipeg to 12.7% in Sudbury. Average income of individuals declined slightly in the remaining four CMAs, Regina, Calgary, Edmonton and Saskatoon.
- The pattern of changes between 1985 and 1990 in the employment earnings of individuals was similar to that of changes in total income. Between 1985 and 1990, only the average earnings of men declined in various CMAs. Female earners gained in all CMAs, between 15% to 20% in six CMAs and over 21% in two CMAs.
- In 1990, overall average earnings were highest in Toronto (\$29,133), followed by Ottawa-Hull (\$28,248). At the other end was Sherbrooke (\$21,605), followed by Saskatoon (\$22,147).

Faible revenu

- Le nombre des familles dont le revenu se trouve sous les seuils de faible revenu établis par Statistique Canada a diminué, de 1 073 000 en 1985 à 973 000 en 1990. Par conséquent, la fréquence des unités à faible revenu parmi les familles économiques a diminué, de 15,9 % en 1985 à 13,2 % en 1990.
- En 1990, la fréquence de faible revenu était de 9,3 % chez les familles époux-épouse, de 18,8 % chez les familles monoparentales dont le parent est un homme et de 44,7 % chez les familles monoparentales dont le parent est une femme.
- La fréquence était la plus faible à l'Île-du-Prince-Édouard (10,3 %) et en Ontario (10,9 %). Elle était le plus élevée au Québec (16,2 %) et à Terre-Neuve (15,8 %).
- Comparativement à 41,3 % en 1985, le revenu total de 36,5 % de toutes les personnes hors famille économique était sous les seuils de faible revenu de Statistique Canada en 1990. La fréquence était de 31,8 % chez les hommes hors famille économique et de 40,6 % chez les femmes hors famille économique.
- Comparativement à 15,8 % de toutes les personnes au sein de ménages privés, 19,8 % des enfants de moins de 6 ans et 16,9 % des enfants de 6 à 14 ans vivaient dans des familles à faible revenu. La fréquence de faible revenu était de 15,6 % chez les personnes de 65 à 69 ans et de 20,8 % chez celles de 70 ans et plus.

Régions métropolitaines de recensement

- En 1990, le revenu moyen des particuliers était le plus élevé à Toronto (28 814 \$) et à Ottawa-Hull (28 396 \$). Il était le plus bas à Sherbrooke (20 834 \$) et à Trois-Rivières (21 293 \$).
- Après ajustement en fonction de l'inflation, le revenu moyen des particuliers a augmenté, de 1985 à 1990, dans 21 régions métropolitaines de recensement (RMR). Ces augmentations vont de moins de 1 % à Winnipeg à 12,7 % à Sudbury. Le revenu moyen des particuliers a légèrement diminué dans les quatre autres RMR, soit Regina, Calgary, Edmonton et Saskatoon.
- Les tendances des variations, de 1985 à 1990, dans les gains d'emploi des particuliers étaient semblables à celles observées pour le revenu total. De 1985 à 1990, seuls les gains moyens des hommes ont diminué dans les diverses RMR. Les femmes bénéficiaires d'un revenu ont connu des gains dans toutes les RMR, de 15 % à 20 % dans six RMR et de plus de 21 % dans deux RMR.
- En 1990, l'ensemble des gains moyens était le plus élevé à Toronto (29 133 \$), puis à Ottawa-Hull (28 248 \$). À l'autre extrémité de l'échelle se trouvaient Sherbrooke (21 605 \$) et Saskatoon (22 147 \$).

- Nationally, full-year full-time working females earned 67.4% of the amount earned by full-year full-time working males. Only in six CMAs was the ratio of female to male earnings above this national average. The ratio was highest in Ottawa-Hull (71.2%). It was lowest in Saint John where full-year full-time working females earned only 60.9% of the earnings of males.
- Average family income, after adjustment for inflation, increased in all CMAs between 1985 and 1990, but the range of increases was very wide. Families in Sudbury gained the largest at 20.0%, followed by Victoria (14.2%), Saint John (13.2%) and Kitchener (11.8%). Average family income increased by less than 2% in Regina and Saskatoon and by less than 3% in Edmonton, Calgary and Winnipeg.
- In 1990, average family income was highest in Toronto (\$63,736), followed by Ottawa-Hull (\$61,538) and Oshawa (\$58,774). The lowest average family income was in Sherbrooke (\$43,394), followed by Trois-Rivières (\$43,696) and Chicoutimi-Jonquière (\$45,475).
- Increases in average household income between 1985 and 1990, after adjustment for inflation, ranged from lows of 0.9% in Regina, 1.9% in Sherbrooke and 2.3% in Winnipeg and Edmonton, to highs of 17.6% in Sudbury, 15.5% in Victoria and 12.6% in Vancouver. Saskatoon was the only CMA where average household income dropped slightly (0.4%).
- Average household income in 1990 was highest in Toronto at \$59,450, followed by Oshawa at \$55,457 and Ottawa-Hull at \$54,398. In 1985, the top three positions were occupied by Toronto (\$53,541), Ottawa-Hull (\$50,960) and Calgary (\$50,776).
- Between 1985 and 1990, the incidence of low income among private households declined in all CMAs. In 1990, there was substantial variation in the incidence of low income across CMAs. It was highest in Montreal (22.0%), followed by Trois-Rivières (20.4%) and Winnipeg (20.3%). It was lowest in Oshawa (9.3%), followed by Kitchener (11.7%) and Thunder Bay (12.3%).
- Au pays, les femmes travaillant à plein temps toute l'année gagnaient 67,4 % de ce que gagnaient les hommes travaillant à plein temps toute l'année. Dans six RMR seulement, le rapport entre les gains des femmes et ceux des hommes était au-dessus de la moyenne nationale. Ce rapport était le plus élevé à Ottawa-Hull (71,2 %) et le plus bas à Saint John, où les femmes travaillant à plein temps toute l'année gagnaient seulement 60,9 % des gains des hommes.
- Le revenu moyen de la famille, après ajustement en fonction de l'inflation, s'est accru dans toutes les RMR de 1985 à 1990, mais la taille des augmentations variait considérablement. Les familles à Sudbury ont gagné le plus (20,0 %), puis celles de Victoria (14,2 %), de Saint John (13,2 %) et de Kitchener (11,8 %). Le revenu moyen de la famille a augmenté de moins de 2 % à Regina et Saskatoon et de moins de 3 % à Edmonton, Calgary et Winnipeg.
- En 1990, le revenu moyen de la famille était le plus élevé à Toronto (63 736 \$), à Ottawa-Hull (61 538 \$) et à Oshawa (58 774 \$). On observait le revenu moyen de la famille le plus bas à Sherbrooke (43 394 \$), à Trois-Rivières (43 696 \$) et à Chicoutimi-Jonquière (45 475 \$).
- Les augmentations du revenu moyen du ménage, de 1985 à 1990, après ajustement en fonction de l'inflation, allaient de creux de 0,9 % à Regina, 1,9 % à Sherbrooke et 2,3 % à Winnipeg et Edmonton à des sommets de 17,6 % à Sudbury, 15,5 % à Victoria et 12,6 % à Vancouver. Saskatoon était la seule RMR où le revenu moyen du ménage a diminué légèrement (0,4 %).
- Le revenu moyen du ménage était le plus élevé, en 1990, à Toronto (59 450 \$), à Oshawa (55 457 \$) et à Ottawa-Hull (54 398 \$). En 1985, les trois premières places étaient occupées par Toronto (53 541 \$), Ottawa-Hull (50 960 \$) et Calgary (50 776 \$).
- De 1985 à 1990, la fréquence de faible revenu chez les personnes au sein de ménages privés a diminué dans toutes les RMR. En 1990, on observait une variation considérable de la fréquence de faible revenu parmi les RMR. Elle était le plus élevée à Montréal (22,0 %), à Trois-Rivières (20,4 %) et à Winnipeg (20,3 %). Elle était le plus faible à Oshawa (9,3 %), à Kitchener (11,7 %) et à Thunder Bay (12,3 %).

Introduction

This publication presents information from the 1991 Census on the total income and employment income of individuals 15 years of age and over, the total income of census families and private households and the incidence of low income among families, unattached individuals and the population in 1990. Tables are provided for Canada, provinces, territories and census metropolitan areas and include comparable data on incomes in 1985 from the 1986 Census.

Organization of the Publication

This publication provides selected income statistics for individuals, families and households for 1985 and 1990 in constant (1990) dollars. Included are tables presenting 1985 and 1990 total income and employment income size distributions for the population 15 years of age and over by sex, age, work activity and marital status. Census family and household income size distributions for 1985 and 1990 are provided by family structure, combination of employment income recipients, household type and size. One table includes statistics on the incidence of low income among families, unattached individuals and for the population in 1985 and 1990. All tables present data for Canada, provinces, territories and census metropolitan areas.

Table Descriptions

Below is a brief description of the tables included in this publication. In addition to income statistics for 1990, all tables include 1985 income data from the 1986 Census which, after adjustment for the change in the consumer price index, are shown in constant (1990) dollars.

Table 1 presents 1990 and 1985 total income size distributions and average and median incomes for the population 15 years of age and over by sex.

Table 2 presents 1990 and 1985 total income size distributions and average and median incomes for the population 15 years of age and over by sex and age group.

Table 3 presents 1990 and 1985 employment income size distributions and average and median employment incomes for the population 15 years of age and over by sex.

Introduction

Cette publication présente les données du recensement de 1991 sur le revenu total et le revenu d'emploi des personnes âgées de 15 ans et plus, sur le revenu total des familles de recensement et des ménages privés, ainsi que sur la fréquence des unités à faible revenu au sein des familles, des personnes hors famille économique et de la population en général, en 1990. Elle renferme pour le Canada, les provinces, les territoires et les régions métropolitaines de recensement, des tableaux dont les données sont comparables aux données sur le revenu en 1985 recueillies dans le cadre du recensement de 1986.

Structure de la publication

Cette publication présente, en dollars constants de 1990, certaines statistiques sur le revenu des particuliers, des familles et des ménages en 1985 et 1990. Elle comprend des tableaux qui présentent la répartition de la taille du revenu total et du revenu d'emploi en 1985 et 1990 pour la population âgée de 15 ans et plus selon le sexe, l'âge, le travail et l'état matrimonial. Les répartitions de la taille du revenu pour la famille de recensement et pour les ménages en 1985 et 1990 sont fournies selon la structure de la famille, la combinaison de bénéficiaires d'un revenu d'emploi, le genre de ménage et la taille du ménage. Enfin, elle comporte un tableau faisant état de la fréquence des unités à faible revenu au sein des familles, des personnes hors famille économique et de la population en général, en 1985 et 1990. Tous les tableaux présentent des données pour le Canada, les provinces, les territoires et les régions métropolitaines de recensement.

Description des tableaux

Vous trouverez ci-après une brève description de chacun des tableaux figurant dans la publication. En sus de statistiques sur le revenu en 1990, tous les tableaux font état des données du recensement de 1986 sur le revenu en 1985, lesquelles données sont exprimées en dollars constants de 1990 après correction des effets de la variation de l'indice des prix à la consommation.

Le **tableau 1** présente la répartition de la taille du revenu total en 1990 et 1985 ainsi que les revenus moyen et médian pour la population âgée de 15 ans et plus selon le sexe.

Le **tableau 2** présente la répartition de la taille du revenu total en 1990 et 1985 ainsi que les revenus moyen et médian pour la population âgée de 15 ans et plus selon le sexe et le groupe d'âge.

Le **tableau 3** présente la répartition de la taille du revenu d'emploi en 1990 et 1985 ainsi que les revenus d'emploi moyen et médian pour la population âgée de 15 ans et plus selon le sexe.

Table 4 provides the number of employment income recipients 15 years of age and over in 1990 and 1985 and their average employment income by sex, work activity, age group and marital status.

Table 5 presents 1990 and 1985 wage and salary income size distributions and average and median wages and salaries for paid workers 15 years of age and over by sex.

Table 6 presents 1990 and 1985 family income size distributions and average and median family incomes for census families by family structure.

Table 7 presents 1990 and 1985 family income size distributions and average and median family incomes for census families by family structure and combination of employment income recipients.

Table 8 presents 1990 and 1985 household income size distributions and average and median family incomes for private households by household type and number of persons.

Table 9 provides statistics from the 1986 and 1991 Censuses on the incidence of low income among economic families by family structure, unattached individuals by sex and the population by age in 1985 and 1990.

Content Considerations

Counts of the population, households, dwellings or families shown in tabulations based on 20% sample data may differ from those collected on a 100% basis for the following reasons:

- (1) **The exclusion of institutional residents:** Institutional residents are defined as those individuals other than staff members and their families who live in institutional collective dwellings such as residences for senior citizens, hospitals, correctional and penal institutions. Detailed sample data were not collected from this sector of the population.

Le **tableau 4** indique le nombre de bénéficiaires d'un revenu d'emploi âgés de 15 ans et plus et le revenu d'emploi moyen de ces personnes en 1990 et 1985 selon le sexe, le travail, le groupe d'âge et l'état matrimonial.

Le **tableau 5** présente la répartition de la taille de la rémunération en 1990 et 1985 ainsi que les salaires et traitements moyen et médian pour les travailleurs non rémunérés âgés de 15 ans et plus selon le sexe.

Le **tableau 6** présente la répartition de la taille du revenu de la famille en 1990 et 1985 ainsi que les revenus moyen et médian de la famille pour les familles de recensement selon la structure de la famille.

Le **tableau 7** présente la répartition de la taille du revenu de la famille en 1990 et 1985 ainsi que les revenus moyen et médian de la famille pour les familles de recensement selon la structure de la famille et la combinaison de bénéficiaires d'un revenu d'emploi.

Le **tableau 8** présente la répartition de la taille du revenu du ménage en 1990 et 1985 ainsi que les revenus moyen et médian de la famille pour les ménages privés selon le genre de ménage et le nombre de personnes.

Le **tableau 9** présente des statistiques des recensements de 1986 et 1991 sur la fréquence des unités à faible revenu au sein des familles économiques selon la structure de la famille, des personnes hors famille économique selon le sexe et de la population en général selon l'âge, en 1985 et 1990.

Considérations relatives au contenu

Les chiffres de la population, des ménages, des logements ou des familles dans les totalisations utilisant les données-échantillon (20 %) peuvent différer des données intégrales pour les raisons suivantes :

- (1) **L'exclusion des pensionnaires d'un établissement institutionnel :** Ces derniers sont définis comme les personnes autres que les membres du personnel et leur famille qui vivent dans des logements collectifs institutionnels tels que les foyers pour personnes âgées, les hôpitaux, les établissements de correction et établissements pénitentiaires. On n'a pas recueilli de données-échantillon détaillées pour ce secteur de la population.

- (2) **Weighting:** Data collected on a sample basis were weighted up to provide estimates of the entire population excluding institutional residents. However, weighted counts are subject to sampling variability. This means, for any given area, the weighted count may differ from that shown in tabulations containing data collected on a 100% basis. While the differences are relatively small for geographic areas with large populations, they can be greater for areas with small populations. For further information on this topic, please contact the Social Survey Methods Division at Statistics Canada, Ottawa, Canada K1A 0T6 (613) 951-6940.

Users should also be aware that differences in counts may be due to the different subpopulations or universes for which the data are reported. For example, mobility data are reported for persons 5 years and over for the 5 year interval data and 1 year and over for the 1 year interval data, excluding those temporarily residing overseas; education, labour force and income data are reported for persons 15 years and over. Furthermore, data may be produced for subsets of these universes such as total labour force, employment income recipients or paid workers. Similar differences may occur in tabulations for households, dwellings or families. The **1991 Census Dictionary** (Catalogue No. 92-301E) provides more detailed information on universes or subpopulations by variable.

Some Indian reserves and Indian settlements were incompletely enumerated during the 1986 and/or 1991 Censuses (see "Special Notes"). These reserves and settlements are identified in Appendix 1.

Comparison of the 1991 Census data with data from earlier censuses is affected by a change in the definition of the 1991 Census population. Persons in Canada on student authorizations, employment authorizations, Minister's permits, and as refugee claimants were enumerated in the 1991 Census but not in previous censuses. These persons are referred to as non-permanent residents. For further information, see the "Special Notes" section.

- (2) **Pondération :** Les données-échantillon sont pondérées afin de fournir des estimations de la population tout entière à l'exclusion des pensionnaires d'un établissement institutionnel. Cependant, les chiffres pondérés se caractérisent par la variabilité d'échantillonnage, ce qui signifie que pour toute région donnée, le chiffre pondéré peut différer de celui qui figure dans les totalisations contenant les données intégrales. Bien que les différences soient relativement faibles pour les régions géographiques ayant de fortes populations, elles peuvent être plus importantes dans le cas des régions avec de petites populations. Pour de plus amples renseignements sur ce sujet, veuillez communiquer avec la Division des méthodes d'enquêtes sociales de Statistique Canada, Ottawa, Canada K1A 0T6 (613) 951-6940.

Les utilisateurs doivent également noter que les différences de chiffre peuvent s'expliquer par les diverses sous-populations ou univers pour lesquels les données sont publiées. Ainsi, les données sur la mobilité (période de 5 ans) sont publiées pour les personnes âgées de cinq ans et plus et les données sur la mobilité (période de 1 an) pour les personnes âgées de un an et plus, excluant celles qui résident temporairement outre-mer; les données sur la scolarité, la population active et le revenu ne sont déclarées que pour les personnes âgées de 15 ans et plus. De plus, des données peuvent être produites pour les sous-ensembles de ces univers tels que la population active totale, les bénéficiaires d'un revenu d'emploi ou les travailleurs rémunérés. Des différences similaires peuvent se glisser dans les totalisations pour les ménages, les logements ou les familles. Le **Dictionnaire du recensement de 1991** (n° 92-301F au catalogue) contient plus de renseignements détaillés sur les univers ou les sous-populations par variable.

Certaines réserves indiennes et établissements indiens n'ont été que partiellement dénombrés lors des recensements de 1986 et/ou de 1991 (voir «Notes spéciales»). Ces réserves et ces établissements sont indiqués à l'annexe 1.

La comparaison des données du recensement de 1991 avec celles des recensements précédents est affectée par la modification apportée à la définition de la population du recensement de 1991. Les titulaires d'un permis de séjour pour étudiants, d'un permis de travail, d'un permis ministériel et les revendicateurs du statut de réfugié ont été dénombrés au recensement de 1991, mais ne l'ont pas été aux recensements antérieurs. Ces personnes sont des résidents non permanents. Pour plus de renseignements, voir la section «Notes spéciales».

Income

Table 9 includes comparable data on the incidence of low income in 1985 and 1990. These statistics are based on the low income cut-offs determined from the 1986 family expenditure data and adjusted for changes in the consumer price index. Low income statistics for 1985 published in the 1986 Census bulletin **Family Income: Economic Families**, Catalogue No. 93-118, were based on cut-offs derived from the 1978 family expenditure data and will, therefore, show minor differences from those shown in this report.

For further information on Income Status, Incidence of Low Income and Low Income Cut-offs, see the "Definitions" section.

All tables in this publication include data from the 1986 Census for census metropolitan areas (CMAs). The differences in the CMA boundaries between 1986 and 1991 have been taken into consideration by adjusting the 1986 data to approximate as closely as possible to the 1991 boundary delineation.

Additional information on content considerations, definitions of terms, explanations of data quality, etc., may also be found at the end of this publication, immediately following the data tables. (This information is presented separately in English and in French sections for easier use.)

Symbols

The following standard symbols may be found in Census products.

- .. Figures not available.
- ... Figures not appropriate or not applicable.
- Nil or zero.
- Amount too small to be expressed.
- XXX Figures suppressed to protect confidentiality.
- ** The median could not be calculated as it occurred in an open-ended class.
- * Land area is included in neighbouring census subdivision.
- An error exists in the 1991 counts for this census subdivision (CSD). For further information, see the "Special Notes" section.
- A Adjusted figure due to boundary change.

Revenu

Les données comparatives du tableau 9 sur la fréquence des unités à faible revenu en 1985 et 1990 sont basées sur les seuils de faible revenu déterminés à partir des données sur les dépenses des familles de 1986 et corrigées des effets de la variation de l'indice des prix à la consommation. Comme les statistiques sur la fréquence des unités à faible revenu en 1985 publiées dans le bulletin du recensement de 1986 **Revenu de la famille : familles économiques**, n° 93-118 au catalogue, étaient basées sur les seuils déterminés à partir des données sur les dépenses des familles en 1978, elles différeront quelque peu des statistiques dont il est fait état dans le présent rapport.

Pour obtenir de plus amples renseignements sur la catégorie de revenu, la fréquence des unités à faible revenu et les seuils de faible revenu, reportez-vous à la section «Définitions».

Tous les tableaux de cette publication comprennent des données du recensement de 1986 pour les régions métropolitaines de recensement (RMR). Afin qu'il soit tenu compte des différences entre les limites des RMR de 1986 et celles des RMR de 1991, les données de 1986 ont été corrigées afin de correspondre le plus exactement possible à la délimitation des limites de 1991.

Vous trouverez également à la fin de la présente publication, immédiatement après les tableaux de données, d'autres informations sur les considérations relatives au contenu, à la définition de termes, à la qualité des données, etc. (Ces informations sont présentées séparément en français et en anglais pour en faciliter l'usage.)

Signes conventionnels

Les signes conventionnels suivants peuvent être retrouvés dans les produits du recensement.

- .. Nombres non disponibles.
- ... N'ayant pas lieu de figurer.
- Néant ou zéro.
- Nombres infimes.
- XXX Nombres supprimés afin de protéger la confidentialité.
- ** Il est impossible de calculer la médiane car elle se trouve dans une des classes ouvertes de répartition utilisée pour calculer la médiane.
- * La superficie est comprise dans la subdivision de recensement avoisinante.
- Une erreur a été relevée dans les chiffres de 1991 pour cette subdivision de recensement (SDR). Pour plus de renseignements, voir la section «Notes spéciales».
- A Chiffre ajusté à cause de changement de limite.

† Excludes Census data for one or more incompletely enumerated Indian reserves or Indian settlements. For further information, see the "Special Notes" section.

¶ Incompletely enumerated Indian reserve or Indian settlement. For further information, see the "Special Notes" section.

† Ne comprend pas les données du recensement pour une ou plusieurs réserves indiennes ou établissements indiens partiellement dénombrés. Pour plus de renseignements, voir la section «Notes spéciales».

¶ Réserve indienne ou établissement indien partiellement dénombré. Pour plus de renseignements, voir la section «Notes spéciales».

Definitions

The definitions of geographic terms and census concepts are presented here in summary form only. Users should refer to the **1991 Census Dictionary** (Catalogue No. 92-301E) for the full definitions and additional remarks related to these concepts and definitions.

Age

Refers to the age at last birthday (as of the census reference date, June 4, 1991). This variable is derived from date of birth.

Census Family Structure

Refers to the classification of census families into husband-wife families (with or without children present), and lone-parent families by sex of parent. Husband-wife families may be further disaggregated into “now-married couples” and “common-law couples”.

Census Family Total Income

The total income of a census family is the sum of the total incomes of all members of that family. Similarly, the income of a family from a particular source or sources is the sum of incomes of all family members from that source or sources.

Census Metropolitan Area (CMA)

The general concept of a census metropolitan area (CMA) is one of a very large urban area, together with adjacent urban and rural areas which have a high degree of economic and social integration with that urban area.

A CMA is delineated around an urban area (called the urbanized core and having a population of at least 100,000, based on the previous census). Once an area becomes a CMA, it is retained in the program even if its population subsequently declines.

Smaller urban areas, centred on urbanized cores of a population of at least 10,000, are included in the census agglomeration (CA) program.

Constant (1990) Dollars Income

Refers to the presentation of 1985 income statistics in terms of 1990 dollars. To convert the 1985 incomes into 1990 dollars, the 1985 values were revised upwards by the change in the consumer price index between 1985 and 1990.

Economic Family and Census Family

Economic Family

Refers to a group of two or more persons who live in the same dwelling and are related to each other by blood, marriage, common-law or adoption.

Census Family

Refers to a now-married couple (with or without never-married sons and/or daughters of either or both spouses), a couple living common-law (again with or without never-married sons and/or

daughters of either or both partners), or a lone parent of any marital status, with at least one never-married son or daughter living in the same dwelling.

It should be noted that the family, as determined for the purposes of this publication, is the family as constituted on Census Day. Even though income information in the census is requested for the reference year (the year preceding the census year), no recall or adjustment is made to account for persons who were family members for part of the reference year and who left because of death, divorce, or other reason. Also, some family units existing on Census Day may not have been family units in the reference year, or may have been family units for only a part of that year.

Economic Family Structure

Refers to the classification of economic families into husband-wife economic families and non-husband-wife economic families.

Husband-wife economic families are those in which one of two spouses, either the husband or the wife, is the economic family reference person.

Non-husband-wife economic families are of two kinds: those in which either a male or female lone parent is the economic family reference person, or those in which a non-census family person is the economic family reference person.

Economic Family Total Income

The total income of an economic family is the sum of the total incomes of all members of that family. Similarly, the income of a family from a particular source or sources is the sum of incomes of all family members from that source or sources.

Employment Income

Refers to total income received by persons 15 years of age and over during 1990 as wages and salaries, net income from unincorporated non-farm business and/or professional practice and net farm self-employment income.

Full-time or Part-time Weeks Worked

Refers to persons who worked in the reference year (the year preceding the census year). These persons were asked to report whether the weeks they worked in the reference year were full weeks (30 hours or more per week) of work or not. Persons with a part-time job for part of the year and a full-time job for another part of the year were to report the information for the job at which they worked the most weeks.

Household Total Income

The total income of a household is the sum of the total incomes of all members of that household.

Household Type

Refers to the basic division of private households into family and non-family households. Family household refers to a household

that contains at least one census family, that is a married couple with or without never-married sons or daughters, or a couple living common-law with or without never-married sons or daughters, or a lone parent living with one or more never-married sons or daughters (single-parent family).

Incidence of Low Income

The incidence of low income is the proportion or percentage of economic families or unattached individuals in a given classification below the low income cut-offs. These incidence rates are calculated from unrounded estimates of economic families and unattached individuals 15 years of age and over. Since all members of an economic family share a common status, incidence of low income is also calculated for the population in private households.

Income: Average, Median and Standard Error

Average Income

Average income refers to the weighted mean total income of a group of income units (individuals, families or households) and is calculated from unrounded data by dividing the aggregate income of the group (e.g., males, 45-54 years of age, female lone-parent families, one-person households) by the number of units in that group.

In the case of individuals, average income is calculated only for individuals with income (positive or negative). In all other cases, both with and without income units are included in the calculation.

This concept and procedure applies to total income, employment income, wages and salaries and any other component of income.

Median Income

The median income of a specified group of income units is that amount which divides their income size distribution into two halves, i.e. the incomes of the first half of the income units are below the median, while those of the second half are above the median.

In the case of individuals, median income is calculated only for individuals with income (positive or negative). In all other cases, both with and without income units are included in the calculation.

This concept and procedure applies to total income, employment income, wages and salaries and any other component of income.

Standard Error of Average Income

Refers to the estimated standard error of average income. It is an estimate of the error introduced into these data due to the fact that they are collected only from a one in five random sample of households. When using these figures, the user can be reasonably certain that the true value of the average income (i.e. the value that would have been obtained had sampling not been used) lies within plus or minus twice the standard error and virtually certain that it lies within plus or minus three times the standard error. These estimates of standard error do not include

the effects of certain types of response error or systematic or coverage errors.

Income Status

Refers to the position of an economic family or an unattached individual 15 years of age and over in relation to Statistics Canada's low income cut-offs (LICOs).

Low Income Cut-offs (LICOs)

Measures of low income known as low income cut-offs (LICOs) were first introduced in Canada in 1968 based on 1961 Census income data and 1959 family expenditure patterns. At that time, expenditure patterns indicated that Canadian families spent about 50% of their income on food, shelter and clothing. It was arbitrarily estimated that families spending 70% or more of their income on these basic necessities would be in "straitened" circumstances. With this assumption, low income cut-off points were set for five different sizes of families.

Subsequent to these initial cut-offs, revised low income cut-offs were established based on national family expenditure data from 1969, 1978 and 1986. These data indicated that Canadian families spent, on average, 42% in 1969, 38.5% in 1978 and 36.2% in 1986 of their income on basic necessities. By adding the original difference of 20 percentage points to the basic level of expenditure on necessities, new low income cut-offs were set at income levels differentiated by family size and degree of urbanization. Since then, these cut-offs have been updated yearly by changes in the consumer price index.

Based on the 1986 revised cut-offs and adjusted for the changes in the Consumer Price Index, the following are the 1985 and 1990 matrices of low income cut-offs:

Low Income Cut-offs for Economic Families and Unattached Individuals, 1985

Family size	Size of area of residence				
	500,000 or more	100,000 to 499,999	30,000 to 99,999	Small urban areas	Rural areas (farm and non-farm)
1	11,382	9,996	9,766	8,902	7,748
2	15,428	13,551	13,238	12,068	10,504
3	19,610	17,224	16,826	15,339	13,350
4	22,578	19,830	19,372	17,660	15,371
5	24,669	21,666	21,166	19,295	16,793
6	26,776	23,518	22,975	20,944	18,229
7 or more	28,800	25,295	24,711	22,527	19,606

Low Income Cut-offs for Economic Families and Unattached Individuals, 1990

Family size	Size of area of residence				
	500,000 or more	100,000 to 499,999	30,000 to 99,999	Small urban areas	Rural areas (farm and non-farm)
1	14,155	12,433	12,146	11,072	9,637
2	19,187	16,854	16,464	15,008	13,064
3	24,389	21,421	20,926	19,076	16,605
4	28,081	24,662	24,094	21,964	19,117
5	30,680	26,946	26,324	23,997	20,887
6	33,303	29,248	28,573	26,047	22,672
7 or more	35,818	31,460	30,734	28,017	24,385

Marital Status

Refers to the conjugal status of a person.

Now married (excluding separated)

Persons whose husband or wife is living, unless the couple is separated or a divorce has been obtained. Persons living common-law are considered as "Now married".

Separated

Persons who have been deserted or who have parted because they no longer want to live together, but have not obtained a divorce.

Divorced

Persons who have obtained a legal divorce and who have not remarried.

Widowed

Persons who have lost their spouse through death and who have not remarried.

Never married (single)

Persons who have never married (including all persons less than 15 years of age) and persons whose marriage was annulled and who have not remarried.

Private Household

Refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada.

Province

Refers to the major political division of Canada. From a statistical point of view, it is a basic unit for which data are tabulated and cross-classified.

Sex

Refers to the gender of the respondent.

Sources of Income

All persons 15 years of age or over were asked to report their total money income from the following sources during the calendar year 1990:

(a) Wages and Salaries

Refers to gross wages and salaries before deductions for such items as income tax, pensions, unemployment insurance, etc. Included in this source are military pay and allowances, tips, commissions and cash bonuses, as well as all types of casual earnings in the 1990 calendar year. The value of taxable allowances and benefits provided by employers, such as free lodging and free automobile use, is excluded.

(b) Net Income from Unincorporated Non-farm Business and/or Professional Practice

Refers to net income (gross receipts minus expenses of operation such as wages, rents and depreciation) received during calendar year 1990 from the respondent's non-farm unincorporated business or professional practice. In the case of a partnership, only the respondent's share was to be reported. Also included is net income from persons baby-sitting in their own homes, operators of direct distributorships such as those selling and delivering cosmetics, as well as from free-lance activities of artists, writers, music teachers, hairdressers, dressmakers, etc.

(c) Net Farm Self-employment Income

Refers to net income (gross receipts from farm sales minus depreciation and cost of operation) received during calendar year 1990 from the operation of a farm, either on own account or in partnership. In the case of partnerships, only the respondent's share of income was to be reported. Also included are advance, supplementary or assistance payments to farmers by federal or provincial governments. However, the value of income "in kind", such as agricultural products produced and consumed on the farm, is excluded.

(d) Old Age Security Pension and Guaranteed Income Supplement

Refers to Old Age Security pensions and Guaranteed Income Supplements paid to persons 65 years of age and over, and Spouses' Allowances paid to 60- to 64-year-old spouses of Old Age Security recipients by the federal government only during the calendar year 1990. Also included are Extended Spouses' Allowances paid to 60- to 64-year-old widows/widowers.

(e) Benefits from Canada or Quebec Pension Plan

Refers to benefits received in calendar year 1990 under the Canada or Quebec Pension Plan, e.g., retirement pensions, survivors' benefits and disability pensions. Does not include lump-sum death benefits.

(f) Family Allowances

Refers to total allowances paid in calendar year 1990 by the federal and provincial governments in respect of dependent children under 18 years of age. For Quebec residents, "Allowance for children less than 6 years of age" and

"Allowance for newborn children" are included. These allowances, though not collected directly from respondents, were calculated and included in the income of one of the parents.

(g) Federal Child Tax Credits

Refers to federal Child Tax Credits paid in calendar year 1990 by the federal government in respect of dependent children under 18 years of age. These credits, though not collected directly from respondents, were calculated and included in the income of one of the parents.

(h) Benefits from Unemployment Insurance

Refers to total Unemployment Insurance benefits received in calendar year 1990, before income tax deductions. It includes benefits for sickness, maternity, fishing, work sharing, retraining and retirement received under the Federal Unemployment Insurance Program.

(i) Other Income from Government Sources

Refers to all transfer payments, excluding those covered as a separate income source (Family Allowances, federal Child Tax Credits, Old Age Security pensions and Guaranteed Income Supplements, Canada or Quebec Pension Plan benefits and Unemployment Insurance benefits) received from federal, provincial or municipal programs in calendar year 1990. This source includes social assistance payments received by persons in need, such as mothers with dependent children, persons temporarily or permanently unable to work, elderly individuals, the blind and the disabled. Included are provincial income supplement payments to seniors to supplement the Old Age Security pension and Guaranteed Income Supplement and provincial payments to seniors to help offset accommodation costs. Also included are other transfer payments such as benefits under the Canadian Jobs Strategy, veterans' pensions, war veterans' allowance, pensions to widows and dependants of veterans and workers' compensation. Additionally, any amounts received in 1990 for refundable Provincial Tax Credits, Federal Sales Tax Credits and the federal Goods and Services Tax Credits are included.

(j) Dividends and Interest on Bonds, Deposits and Savings Certificates and Other Investment Income

Refers to interest received in calendar year 1990 from deposits in banks, trust companies, co-operatives, credit unions, caisses populaires, etc., as well as interest on savings certificates, bonds and debentures and all dividends from both Canadian and foreign stocks. Also included is other investment income from either Canadian or foreign sources such as net rents from real estate, mortgage and loan interest received, regular income from an estate or trust fund, and interest from insurance policies.

(k) Retirement Pensions, Superannuation and Annuities

Refers to all regular income received during calendar year 1990 as the result of having been a member of a pension plan of one or more employers. It includes payments received from all annuities, including payments from a matured

Registered Retirement Savings Plan (RRSP) in the form of a life annuity, a fixed term annuity, a registered retirement income fund or an income-averaging annuity contract; pensions paid to widows or other relatives of deceased pensioners; pensions of retired civil servants, Armed Forces personnel and Royal Canadian Mounted Police (RCMP) officers; annuity payments received from the Canadian Government Annuities Fund, an insurance company, etc. Does not include lump-sum death benefits, lump-sum benefits or withdrawals from a pension plan or RRSP or refunds of overcontributions.

(l) Other Money Income

Refers to regular cash income received during calendar year 1990 and not reported in any of the other nine sources listed on the questionnaire, e.g., alimony, child support, periodic support from other persons not in the household, net income from roomers and boarders, income from abroad (except dividends and interest), non-refundable scholarships and bursaries, severance pay, royalties and strike pay.

Receipts Not Counted as Income

Gambling gains and losses, money inherited during the year in a lump sum, capital gains or losses, receipts from the sale of property or personal belongings, income tax refunds, loans received, loans repaid to an individual as the lender, lump-sum settlements of insurance policies, rebates of property taxes and other taxes, and refunds of pension contributions were excluded as was all income "in kind" such as free meals, living accommodations, or agricultural products produced and consumed on the farm.

Total Income

"Total income" refers to the sum of amounts received during 1990 by an income recipient from the sources of income listed above.

Territory

Refers to two major political divisions of Canada, namely Yukon Territory and Northwest Territories. From a statistical point of view, these territories are equivalent to provinces, i.e. a basic unit for which data are tabulated and cross-classified.

Unattached Individual

Refers to a household member who is not a member of an economic family. Unattached individuals may either live alone or in a household where they are not related to any other member of that household. There is no age stipulation except that those living alone must be 15 years or over.

Work Activity

Refers to the number of weeks in which a person worked in the reference year (the year preceding the census year) and whether these weeks worked were full-time or part-time. Individuals who worked 49 to 52 weeks, mostly full time, are classified as full-year, full-time workers.

Data Quality

General

The 1991 Census was a large and complex undertaking and, while considerable effort was taken to ensure high standards throughout all collection and processing operations, the resulting estimates are inevitably subject to a certain degree of error. Users of census data should be aware such error exists, and have some appreciation of its main components, so that they can assess the usefulness of census data for their purposes and the risks involved in basing conclusions or decisions on these data.

Errors can arise at virtually every stage of the census process from the preparation of materials, through the listing of dwellings and data collection to processing. Some errors occur more or less at random, and when the individual responses are aggregated for a sufficiently large group, such errors tend to cancel out. For errors of this nature, the larger the group, the more accurate the corresponding estimate. It is for this reason that users are advised to be cautious when using small estimates. There are some errors, however, which might occur more systematically, and which result in "biased" estimates. Because the bias from such errors is persistent no matter how large the group for which responses are aggregated, and because bias is particularly difficult to measure, systematic errors are a more serious problem for most data users than the random errors referred to previously.

For census data in general, the principal types of error are as follows:

- **coverage errors**, which occur when dwellings and/or individuals are missed, incorrectly included or double counted;
- **non-response errors**, which result when responses cannot be obtained from a small number of households and/or individuals, because of extended absence or some other reason;
- **response errors**, which occur when the respondent, or sometimes the Census Representative, misunderstands a census question, and records an incorrect response;
- **processing errors**, which can occur at various steps including: **coding**, when "write-in" responses are transformed into numerical codes; **data capture**, when responses are transferred from the census questionnaire to computer tapes by key-entry operators; and **imputation** when a "valid", but not necessarily correct, response is inserted into a record by the computer to replace missing or "invalid" data ("valid" and "invalid" referring to whether or not the response is consistent with other information on the record);
- **sampling errors**, which apply only to the supplementary questions on the "long form" asked of a one-fifth sample of households, and which arise from the fact that the results for these questions, when weighted up to represent the whole population, inevitably differ somewhat from the results which would have been obtained if these questions had been asked of all households.

The above types of error each have both random and systematic components. Usually, however, the systematic component of sampling error is very small in relation to its random component. For the other non-sampling errors, both random and systematic components may be significant.

Coverage Errors

Coverage errors affect the accuracy of the census counts, that is the sizes of the various census universes: population, families, households and dwellings. While steps have been taken to correct certain identifiable errors, the final counts are still subject to some degree of error resulting from persons or dwellings being missed, incorrectly included in the census or double counted.

Missed dwellings or persons result in **undercoverage**. Dwellings can be missed because of misunderstanding of enumeration area (EA) boundaries, or because dwellings are hidden or appear uninhabitable. Persons can be missed when their dwelling is missed or classified as vacant, or when individual household members are omitted from the questionnaire because the respondent misinterprets the instructions on whom to include. Some individuals may be missed because they have no usual residence and did not spend census night in any dwelling.

Dwellings or persons that are incorrectly included or double counted result in **overcoverage**. Overcoverage of dwellings can occur when structures unfit for habitation are listed as dwellings, or when units which do not meet the census definition of a dwelling are listed separately instead of being treated as part of a larger dwelling. Double counting of dwellings can occur, for example, because of ambiguity over EA boundaries. Persons can be double counted because their dwelling is double counted or because the guidelines on whom to include on the questionnaire have been misunderstood. Occasionally, someone who is not in the census population universe, such as a foreign resident or a fictitious person, may, incorrectly, be enumerated in the census. On average, overcoverage is less likely to occur than undercoverage and, as a result, counts of dwellings and persons are likely to be slightly underestimated.

In 1991, four studies were undertaken to measure different aspects of coverage error. First, a sample of dwellings listed as vacant was revisited to verify that they really were vacant on Census Day. Adjustments have been made to the final census counts for households and persons missed because their dwelling was incorrectly classified as vacant. Second, a sample of persons enumerated as temporary residents was selected to verify whether or not they were enumerated at their usual place of residence. Based on this sample, estimates were obtained of the number of persons missed because they were temporarily absent from their usual place of residence. Corresponding adjustments were made to the final population counts. Despite these adjustments, the final counts are still subject to some undercoverage. For Canada as a whole and for each province and territory, the magnitude of this residual undercoverage in the 1991 Census is being measured by means of a special study known as the Reverse Record Check. Undercoverage tends to be higher for certain segments of the population such as young adult males and recent immigrants. The fourth study, known as the Overcoverage Study, is designed to investigate overcoverage errors. The results of the Reverse Record Check

and the Overcoverage Study, when taken together, furnish an estimate of net undercoverage.

Other Non-Sampling Errors

While coverage errors affect the number of units in the various census universes, other errors affect the characteristics of those units.

Sometimes, it is not possible to obtain a complete response from a household, even though the dwelling was identified as occupied and a questionnaire dropped off. The household members may have been away throughout the census period or, in rare instances, the householder may have refused to complete the form. More frequently, the questionnaire is returned but information is missing for some questions or individuals. Considerable effort is devoted to ensure as complete a response as possible. Census representatives edit the questionnaires and follow up on missing information. The Census Representative's work is then checked by both a supervisor and a quality control technician. Despite this, at the end of the collection stage, a small number of responses is still missing. Although missing entries are eliminated during processing by replacing a missing value by the corresponding entry for a "similar" record, there remain some potential **non-response errors**. This is particularly serious if the non-respondents differ in some respects from the respondents, since this procedure will result in **non-response bias**.

Even when a response is obtained, it may not be entirely accurate. The respondent may have misinterpreted the question or may have guessed the answer, especially when answering on behalf of another, possibly absent, household member. Such errors are referred to as **response errors**. While response errors usually arise from inaccurate information provided by respondents, they can also result from mistakes by the Census Representative when completing certain parts of the questionnaire, such as structural type of dwelling, or when calling back to obtain a missing response.

Some of the questions on the census document require a written response. During processing, these "write-in" entries are given a numeric code. **Coding errors** can occur, especially when the code list is extensive (as with, for example, language, ethnic origin, industry and occupation), and when the written response is ambiguous, incomplete or difficult to read. Coding errors are controlled, though not completely eliminated, by verifying a sample of the codes and taking corrective action where necessary. For the first time in 1991, much of the coding was automated, partly in an effort to reduce the extent of coding errors.

The information on the questionnaires is key-entered onto a computer file. Two procedures are used to control the number of **data capture errors**. First, certain edits (such as range checks) are performed as the data are keyed. Second, a sample from each batch of documents is re-keyed and compared with the original entries. If there is more than a specified number of errors among the original entries, the whole batch is re-keyed.

Once the data have been captured, they are sent to Ottawa where they undergo a series of computer checks to identify missing or inconsistent responses. In the case of inconsistent responses, it has first to be decided which response is to be

considered invalid. Invalid or missing responses must then be replaced by valid responses, that is, responses which are consistent with other data on the record. For a small proportion of cases, the correct response can be inferred from other data on the record. In most cases, however, this is not possible and a valid response is obtained from a "donor" record selected at random from among a group of consistent records which are similar to the invalid record in terms of a number of related characteristics. There is, of course, no guarantee that the imputed value will necessarily be the correct response for the individual concerned. However, provided the missing or invalid records are similar, on average, to the valid records, any **imputation errors** will more or less cancel out when results are tabulated for a sufficiently large geographic area or population subgroup.

Various studies are being carried out to evaluate the quality of the responses obtained in the 1991 Census. For each question, response rates and edit failure rates have been calculated. These can be useful in identifying the potential for non-response and other errors. Also, tabulations from the 1991 Census have been or will be compared with corresponding estimates from previous censuses, from sample surveys (such as the Labour Force Survey) and from various administrative records (such as birth registrations and municipal assessment records). Such comparisons can indicate potential quality problems or at least discrepancies between the sources.

In addition to these aggregate-level comparisons, there are some micromatch studies in progress, in which census responses are compared with another source of information at the individual record level. For certain "stable" characteristics (such as age, sex, mother tongue, place of birth), the responses obtained in the 1991 Census, for a sample of individuals, are being compared with those for the same individuals in the 1986 Census. Also, following the 1991 Census, a sample of persons was re-enumerated, primarily to determine overcoverage rates. At the same time, however, interviewers asked a series of detailed questions on language, ethnic origin and marital status; the responses will be compared with the corresponding census responses in order to identify, and hopefully understand, response errors.

Sampling Errors

Estimates obtained by weighting up responses collected on a sample basis are subject to error due to the fact that the distribution of characteristics within the sample will not usually be identical to the distribution of characteristics within the population from which the sample has been selected.

The potential error introduced by sampling will vary according to the relative scarcity of the characteristics in the population. For large cell values, the potential error due to sampling, as a proportion of the cell value, will be relatively small. For small cell values, this potential error, as a proportion of the cell value, will be relatively large.

The potential error due to sampling is usually expressed in terms of the so-called "standard error". This is the square root of the average, taken over all possible samples of the same size and

design, of the squared deviation of the sample estimate from the value for the total population.

The table below provides approximate measures of the standard error due to sampling. These measures are intended as a general guide only.

Table: Approximate Standard Error Due to Sampling for 1991 Census Sample Data

Cell Value	Approximate Standard Error
50 or less	15
100	20
200	30
500	45
1,000	65
2,000	90
5,000	140
10,000	200
20,000	280
50,000	450
100,000	630
500,000	1400

Users wishing to determine the approximate error due to sampling for any given cell of data, based upon the 20% sample, should choose the standard error value corresponding to the cell value that is closest to the value of the given cell in the census tabulation. When using the obtained standard error value, in general the user can be reasonably certain that, for the enumerated population, the true value (discounting all forms of error other than sampling) lies within plus or minus three times the standard error (e.g., for a cell value of 1,000, the range would be $1,000 \pm 3 \times 65$ or $1,000 \pm 195$).

The standard errors given in the table above will not apply to population or universe (persons, households, dwellings or families) totals or subtotals for the geographic area under consideration (see Sampling and Weighting). The effect of sampling for these cells can be determined by comparison with a corresponding 100% publication.

The effect of the particular sample design and weighting procedure used in the 1991 Census will vary, however, from one characteristic to another and from one geographic area to another. The standard error values in the table may, therefore, understate or overstate the error due to sampling.

For further information on the quality of census data, contact the Social Survey Methods Division at Statistics Canada, Ottawa, Canada K1A 0T6 (613) 951-6940.

Confidentiality and Random Rounding

The figures shown in the tables have been subjected to a confidentiality procedure known as "**random rounding**". This is done to prevent the possibility of associating statistical data with

any identifiable individual. Under this method, all figures including totals are randomly rounded either up or down to a multiple of "5", and in some cases "10". While providing strong protection against disclosure, this technique does not add significant error to the census data. However, there are some consequences for the users. Since totals are independently rounded, they do not necessarily equal the sum of individually rounded figures in distributions. Also, minor differences can be expected in corresponding totals and cell values in various census tabulations. Similarly, percentages, which are calculated on rounded figures, do not necessarily add up to 100. Percentage distributions and rates for the most part are based on rounded data, while percentage changes and averages are based on unrounded data. It should also be noted that small cell counts may suffer a significant distortion as a result of random rounding. Individual data cells containing small numbers may lose their precision as a result.

Users should be aware of possible data distortions when they are aggregating these rounded data. Imprecisions as a result of rounding tend to cancel each other out when data cells are reaggregated. However, users can minimize these distortions by using, whenever possible, the appropriate subtotals when aggregating.

For those requiring maximum precision, the option exists to use custom tabulations. With custom products, aggregation is done using individual census database records. Random rounding occurs only after the data cells have been aggregated, thus minimizing any distortion.

In addition to random rounding, **area suppression** has been adopted to further protect the confidentiality of individual responses.

Area suppression results in the deletion of all characteristic data for geographic areas with populations below a specified size. The extent to which data are suppressed depends upon the following factors:

- if the data are tabulated from the 100% database, suppression is based upon the total population;
- if the data are tabulated from the 20% sample database, suppression is based upon the non-institutional population;
- if the data contain an income distribution, those areas with populations below 250 persons are suppressed;
- if the data **do not** contain an income distribution, those areas with a population of less than 40 persons are suppressed.

In all cases, suppressed data are included in the appropriate higher aggregate subtotals and totals.

This technique is being implemented for all products involving subprovincial data (i.e. Profile series, basic summary tabulations, semi-custom and custom data products) collected on a 100% or 20% sample basis.

Sampling and Weighting

The 1991 Census data were collected either on a 100% basis (i.e. for all households) or on a sample basis (i.e. from only a

random sample of households) with data weighted to provide estimates of the entire population. The information in this report was collected on a 20% sample basis and weighted up to compensate for sampling. All table headings are noted accordingly. Note that, on most Indian reserves and remote areas, all data were collected on a 100% basis.

For any given geographic area, the weighted population, household, dwelling or family total or subtotal may differ from that shown in reports containing data collected on a 100% basis. Such variation (in addition to the effect of random rounding) will be due to sampling.

Special Notes

Population Counts Based on Usual Residence

The population counts shown here for a particular area represent the number of Canadians whose usual place of residence is in that area, regardless of where they happened to be on Census Day. Also included are any Canadians staying in a dwelling in that area on Census Day and having no usual place of residence elsewhere in Canada, as well as those considered “non-permanent residents” (see note on this group). In most areas, there is little difference between the number of usual residents and the number of people staying in the area on Census Day. For certain places, however, such as tourist or vacation areas, or those including large work camps, the number of people staying in the area at any particular time could significantly exceed the number of usual residents shown here.

Incompletely Enumerated Indian Reserves and Indian Settlements

On some Indian reserves and Indian settlements in the 1991 Census, enumeration was not permitted or was interrupted before it could be completed. Moreover, some Indian reserves and Indian settlements were enumerated late or the quality of the collected data was considered inadequate. These geographic areas (a total of 78) are called incompletely enumerated Indian reserves and Indian settlements.

Data for 1991 are therefore not available for the incompletely enumerated reserves and settlements and are not included in tabulations. Data for geographic areas containing one or more of these reserves and settlements are therefore noted accordingly. Because of the missing data, users are cautioned that for the affected geographic areas, comparisons (e.g., percentage change) between 1986 and 1991 are not exact. While for higher level geographic areas (Canada, provinces, census metropolitan areas and census agglomerations) the impact of the missing data is very small, the impact can be significant for smaller areas, where the affected reserves and settlements account for a higher proportion of the population.

A list of incompletely enumerated Indian reserves and Indian settlements along with Population and Occupied Private Dwelling Counts from the last two censuses (where available) has been compiled and is shown in Appendix 1.

Non-permanent Residents

In 1991, for the first time, the census of population included both permanent and non-permanent residents of Canada. Non-permanent residents are persons who hold student or employment authorizations, Minister’s permits or who are refugee claimants.

Prior to 1991, only permanent residents of Canada were included in the census. (The only exception to this was 1941.) Non-permanent residents were considered foreign residents and were not enumerated.

Today in Canada, non-permanent residents make up a growing segment of the population. Their presence can affect the demand for such government services as health care, schooling and employment programs. The inclusion of non-permanent residents in the 1991 Census will also facilitate comparisons with provincial and territorial statistics (marriages, divorces, births and deaths) which include this population. In addition, the census definition is now closer to the United Nations’ recommendation that long-term residents (persons living in a country for one year or longer) be enumerated.

Total population counts, as well as counts for all variables, will be affected by this change in the 1991 Census universe. According to the 1991 Census, there were 223,410 non-permanent residents in Canada, representing slightly less than 1% of the total population. Users should be especially careful when comparing data from 1991 and previous censuses in geographic areas where there is a concentration of non-permanent residents. These include the major metropolitan areas of Ontario, British Columbia and Quebec. The population distribution of non-permanent residents for the provinces, territories and census metropolitan areas is shown in Appendix 2.

Although every attempt was made to enumerate non-permanent residents, the completeness of enumeration of this population was below that achieved for permanent residents. Factors such as language difficulty and a reluctance to complete a government form or understand the need to participate, may have affected the enumeration of non-permanent residents and resulted in undercounting.

Relationship of Income Estimates to the National Accounts and Survey of Consumer Finances

An evaluation of census income estimates against personal income estimates in the national accounts was carried out. After adjustments to the personal income estimates for concepts and coverage, it was found that overall census estimates of aggregate income in 1990 from comparable sources are just over 92% of similar national accounts estimates. Census estimates for some income components compare more favourably than others. Employment income estimates in the census differ from comparable national accounts estimates by about 1%. Census estimates of Old Age Security pensions, Family Allowances and Child Tax Credits are also close to similar national accounts estimates but the estimates for Canada/Quebec Pension Plan benefits and Unemployment Insurance benefits are smaller by about 13%. Census estimates of other government transfer payments and investment income appear to be underestimated to a larger degree.

Census income statistics were also compared with similar statistics from the annual Survey of Consumer Finances. On the whole, results were quite satisfactory. The observed differences between the two sources of income data were ascribed primarily to estimation errors and differences in universe coverage.

For further details, see the 1991 Census Technical Report on income, Catalogue No. 92-340E.

Other Related Products

The 1991 Census product line is designed to serve the diverse needs of our users. A wide range of products and services are available from the 1991 Census of Population. They are organized into five categories:

- (1) **Reference Products** are designed to make census products and services easier to use by helping clients identify their needs and to find and interpret the data.
- (2) **Data Products** present a wide range of census data for standard geographical areas, covering social, cultural and economic characteristics of Canadians.
- (3) **Analytical Products** provide an interpretation of the 1991 Census data covering a variety of topics or themes, and present the findings in easy-to-read publications.
- (4) **Tabulation Services** provide tabulations aimed at meeting users' needs in a more detailed or specific form than is available in standard products.
- (5) **Workshops and Seminars** are offered to inform new and current data users about census data and to assist them in maximizing the value of census data to meet their needs.

To obtain more detailed information on the products and services available from the census, refer to the **1991 Census Catalogue**, Catalogue No. 92-302E. As well, you may contact your nearest Regional Reference Centre listed in the "Contacts" section of this publication.

Listed below are other products with presentation and content similar to this publication. (**Note:** Not all publications are available for purchase. Copies may be referenced through the Regional Reference Centres or Depository Libraries.)

Income Data Publications from the 1986 Census

In addition to the products noted, selected income data, including the incidence of low income, are profiled for the population, census families and private households in federal electoral districts, census metropolitan areas, census divisions and subdivisions and other standard geographic areas in the **Area Profile Series**.

Regional Reference Centres

Statistics Canada's Regional Reference Centres provide a full range of census products and services. Each reference centre is equipped with a library and a sales counter where users can consult or purchase publications, microcomputer diskettes, microfiche, maps and more.

The staff of the Regional Reference Centres provides consultative and research services in addition to providing after-sales service and support, including seminars and workshops on the use of Statistics Canada information.

Each centre has facilities to retrieve information from Statistics Canada's computerized data retrieval systems CANSIM and E-STAT. A telephone inquiry service is also available with toll-free numbers for regional users outside local calling areas. Call, write, fax or visit the nearest Regional Reference Centre for more information.

Additional References and Services

In addition to Regional Reference Centres and depository libraries, Statistics Canada publications may be ordered through your **local bookstore** or **subscription agent**. Contact the nearest Regional Reference Centre for a list of Canadian outlets available, or consult the 1991 Census Catalogue (Catalogue No. 92-302E).

Secondary distributors offer data access and analytical support through a variety of consulting and computer-based services not available at Statistics Canada. The names and addresses of licensed distributors may be obtained from any Regional Reference Centre.

Statistics Canada provides **digital geographic products** which allow computer manipulation of geographic data. A customized retrieval service is available for users who wish to define their own geographic area of study. A variety of data retrieval files and services provide flexibility in selecting a geographic base.

A complete description of available digital files and services is documented in the 1991 Census Catalogue (Catalogue No. 92-302E).

Information concerning **census of agriculture products and services** may be referenced in the 1991 Census of Agriculture Products and Services publication, Catalogue No. 92-303, or by calling toll free 1-800-465-1991.

Users with special data requirements may request **post-census survey services**. Data are made available on microcomputer diskettes for use with spreadsheet software, or on paper output. For additional information, please contact the nearest Regional Reference Centre.

The Electronic Data Dissemination Division (EDDD) is responsible for CANSIM, Statistics Canada's computerized database network and information retrieval service. Users are provided with access to current and historical statistics in various forms including specialized data manipulation and analysis packages, graphics facilities and a bibliographic search service. For more information about CANSIM, contact any Regional Reference Centre.

Définitions

Seul un résumé des définitions des termes géographiques et des concepts du recensement est présenté ici. Les utilisateurs doivent consulter le **Dictionnaire du recensement de 1991** (n° 92-301F au catalogue) pour les définitions complètes et les observations additionnelles pertinentes.

Âge

Âge au dernier anniversaire de naissance (à la date de référence du recensement, soit le 4 juin 1991). Cette variable est établie d'après la réponse à la question sur la date de naissance.

Catégorie de revenu

Situation de la famille économique ou de la personne hors famille économique âgée de 15 ans ou plus par rapport aux seuils de faible revenu (SFR) de Statistique Canada.

État Matrimonial

Situation conjugale d'une personne.

Actuellement marié(e) (sauf séparé(e))

Personne dont le conjoint est vivant, à moins que le couple ne soit séparé ou divorcé; les personnes vivant en union libre sont considérées comme actuellement mariées.

Séparé(e)

Personne qui a été abandonnée par son conjoint ou qui a quitté parce qu'elle ne voulait plus vivre avec cette personne, mais qui n'a pas obtenu de divorce.

Divorcé(e)

Personne qui a obtenu un divorce et qui ne s'est pas remariée.

Veuf(ve)

Personne dont le conjoint est décédé et qui ne s'est pas remariée.

Célibataire (jamais marié(e))

Personne qui n'a jamais été mariée (y compris toute personne de moins de 15 ans), ou personne dont le mariage a été annulé et qui ne s'est pas remariée.

Famille économique et famille de recensement

Famille économique

Groupe de deux personnes ou plus qui vivent dans le même logement et qui sont apparentées par le sang, par alliance, par union libre ou par adoption.

Famille de recensement

Couple actuellement marié (avec ou sans fils et/ou filles jamais mariés des deux conjoints ou de l'un d'eux), couple vivant en union libre (avec ou sans fils et/ou filles jamais mariés des deux partenaires ou de l'un d'eux) ou parent seul (peu importe son état matrimonial) demeurant avec au moins un fils ou une fille jamais marié.

Il convient de prendre note que la famille telle que définie aux fins de la présente publication correspond à la famille telle qu'elle était constituée le jour du recensement. Bien que les données du recensement relatives au revenu soient recueillies pour l'année de référence (l'année précédant l'année du recensement), aucun rappel ni aucun ajustement n'est fait pour tenir compte des personnes qui avaient été des membres de la famille pendant une partie de l'année de référence et qui n'en faisaient plus partie à cause d'un décès, d'un divorce ou d'une autre raison. En outre, certaines unités familiales qui existaient le jour du recensement n'existaient peut-être pas lors de l'année de référence ou peuvent n'avoir existé qu'une partie de cette année.

Fréquence des unités à faible revenu

Proportion ou pourcentage de familles économiques ou de personnes hors famille économique dans une catégorie donnée dont le revenu est inférieur aux seuils de faible revenu. Ces taux de fréquence sont calculés d'après des estimations non arrondies des familles économiques et des personnes hors famille économique âgées de 15 ans et plus. Comme tous les membres d'une famille économique sont dans la même situation, la fréquence des unités à faible revenu est également calculée pour la population dans les ménages privés.

Genre de ménage

Répartition fondamentale des ménages privés en ménages familiaux et en ménages non familiaux. Un ménage familial est un ménage qui comprend au moins une famille de recensement, c'est-à-dire un couple marié avec ou sans fils ou filles jamais mariés, ou un couple vivant en union libre avec ou sans fils ou filles jamais mariés, ou un parent seul avec un ou plusieurs fils ou filles jamais mariés (famille monoparentale).

Ménage privé

Personne ou groupe de personnes (autres que des résidents étrangers) occupant un logement privé et n'ayant pas de domicile habituel ailleurs au Canada.

Personne hors famille économique

Membre d'un ménage qui n'appartient pas à une famille économique. Une personne hors famille économique peut soit vivre seule, soit faire partie d'un ménage avec les membres duquel elle n'a aucun lien de parenté. L'âge n'a pas d'importance, sauf que les personnes qui vivent seules doivent avoir 15 ans ou plus.

Province

Principale division politique du Canada. Du point de vue statistique, il s'agit d'une unité de base selon laquelle les données sont totalisées et recoupées.

Région métropolitaine de recensement (RMR)

Le concept général de région métropolitaine de recensement (RMR) s'applique à un grand noyau urbain ainsi qu'aux régions

urbaines et rurales adjacentes dont le degré d'intégration économique et sociale avec ce noyau urbain est très élevé.

Une RMR est délimitée à partir d'un noyau urbanisé lorsque ce dernier compte au moins 100,000 habitants, d'après les résultats du dernier recensement. Lorsqu'une région devient une RMR, elle continue de faire partie du programme même si, ultérieurement, elle subit une baisse de population.

Les régions urbaines de plus petite taille, dont le noyau urbanisé compte au moins 10,000 habitants, sont comprises dans le programme des agglomérations de recensement (AR).

Revenu d'emploi

Revenu total reçu en 1990 par les personnes âgées de 15 ans ou plus sous forme de rémunération, de revenu net dans une entreprise non agricole non constituée en société et/ou dans l'exercice d'une profession et de revenu net provenant d'un travail autonome agricole.

Revenu en dollars constants (1990)

Il s'agit des statistiques sur le revenu de 1985 exprimées en dollars de 1990. Pour convertir les revenus de 1985 en dollars de 1990, on a augmenté les valeurs de 1985 selon les modifications de l'indice des prix à la consommation entre 1985 et 1990.

Revenu moyen, revenu médian et erreur type

Revenu moyen

Revenu total moyen pondéré d'un groupe d'unités (particuliers, familles ou ménages) qui est calculé à partir de données non arrondies en divisant le revenu total du groupe (p. ex., les hommes de 45 à 54 ans, les familles monoparentales où le parent est de sexe féminin, les ménages comptant une seule personne) par le nombre d'unités dans ce groupe.

Dans le cas des particuliers, le revenu moyen n'est calculé que pour les particuliers ayant touché un revenu (positif ou négatif). Dans tous les autres cas, toutes les unités, qu'elles aient touché ou non un revenu, sont incluses dans le calcul.

Ce concept et cette procédure s'appliquent au revenu total, au revenu d'emploi, aux salaires et traitements et à n'importe quelle autre composante du revenu.

Revenu médian

Valeur centrale séparant en deux parties égales la répartition par tranches de revenu d'un groupe donné d'unités, la première moitié regroupant les unités ayant un revenu inférieur à la médiane, et la seconde, les unités ayant un revenu supérieur à la médiane.

Dans le cas des particuliers, le revenu médian n'est calculé que pour les particuliers ayant touché un revenu (positif ou négatif). Dans tous les autres cas, toutes les unités, qu'elles aient touché ou non un revenu, sont incluses dans le calcul.

Ce concept et cette procédure s'appliquent au revenu total, au revenu d'emploi, aux salaires et traitements et à n'importe quelle autre composante du revenu.

Erreur type de revenu moyen

Estimation de l'erreur type de revenu moyen. Il s'agit d'une estimation de l'erreur introduite dans les données en raison du fait qu'elles sont recueillies auprès d'un échantillon aléatoire composé de seulement un ménage sur cinq. Lorsqu'il utilise ces chiffres, l'utilisateur peut être raisonnablement certain que la vraie valeur du revenu moyen (c.-à-d. la valeur qu'on aurait obtenue si l'on n'avait pas procédé par échantillonnage) se situe à plus ou moins deux fois l'erreur type et pratiquement certain qu'elle se situe à plus ou moins trois fois l'erreur type. Ces estimations de l'erreur type ne tiennent pas compte des effets de certains types d'erreurs de réponse ni des effets des erreurs systématiques ou des erreurs de couverture.

Revenu total de la famille de recensement

Somme des revenus totaux de tous les membres d'une famille de recensement donnée. De même, le revenu d'une famille provenant d'une source ou de plusieurs sources données est la somme des revenus de tous les membres de la famille qui proviennent de cette source ou de ces sources.

Revenu total de la famille économique

Somme des revenus totaux de tous les membres d'une famille économique donnée. De même, le revenu d'une famille provenant d'une source ou de plusieurs sources données est la somme des revenus de tous les membres de la famille qui proviennent de cette source ou de ces sources.

Revenu total du ménage

Somme des revenus totaux de tous les membres du ménage.

Semaines travaillées à plein temps ou à temps partiel

Variable s'appliquant aux personnes qui ont travaillé durant l'année de référence (l'année précédant l'année du recensement). Ces dernières devaient préciser si elles avaient travaillé des semaines complètes (30 heures ou plus par semaine) ou non durant l'année de référence. Les personnes qui avaient un emploi à temps partiel pendant une partie de l'année et un emploi à plein temps pendant l'autre partie devaient répondre en fonction de l'emploi pour lequel elles avaient travaillé le plus grand nombre de semaines.

Sexe

Qualité d'homme ou de femme.

Seuils de faible revenu (SFR)

Les mesures du faible revenu appelées seuils de faible revenu (SFR) ont été établies pour la première fois au Canada en 1968, d'après les données sur le revenu du recensement de 1961 et les régimes de dépenses des familles en 1959. À cette époque, les régimes de dépenses indiquaient que les familles canadiennes consacraient environ 50 % de leur revenu à la nourriture, au logement et à l'habillement. On a arbitrairement estimé que les familles consacrant 70 % ou plus de leur revenu

à ces biens de première nécessité sont « dans le besoin ». À partir de cette hypothèse, des seuils de faible revenu ont été établis pour cinq différentes tailles de famille.

Par la suite, les seuils de faible revenu ont été révisés d'après les données nationales sur les dépenses des familles pour 1969, 1978 et 1986. Selon ces données, les familles canadiennes consacraient en moyenne 42 % de leur revenu aux biens de première nécessité en 1969, contre 38,5 % en 1978 et 36,2 % en 1986. En ajoutant la différence initiale de 20 points au niveau de base des dépenses au chapitre des biens de première nécessité, de nouveaux seuils de faible revenu ont été fixés selon la taille de la famille et le degré d'urbanisation. Depuis, ces seuils de faible revenu ont été mis à jour chaque année d'après les changements subis par l'indice des prix à la consommation.

Les matrices des seuils de faible revenu de 1985 et de 1990, basées sur les seuils révisés de 1986 et ajustées en fonction des changements de l'indice des prix à la consommation, figurent ci-après :

**Seuils de faible revenu pour les familles économiques et
les personnes hors famille économique, 1985**

Taille du secteur de résidence					
Taille de la famille	500,000 et plus	100,000 à 499,999	30,000 à 99,999	Petites régions urbaines	Régions rurales (agricoles et non agricoles)
1	11,382	9,996	9,766	8,902	7,748
2	15,428	13,551	13,238	12,068	10,504
3	19,610	17,224	16,826	15,339	13,350
4	22,578	19,830	19,372	17,660	15,371
5	24,669	21,666	21,166	19,295	16,793
6	26,776	23,518	22,975	20,944	18,229
7 et plus	28,800	25,295	24,711	22,527	19,606

**Seuils de faible revenu pour les familles économiques et
les personnes hors famille économique, 1990**

Taille du secteur de résidence					
Taille de la famille	500,000 et plus	100,000 à 499,999	30,000 à 99,999	Petites régions urbaines	Régions rurales (agricoles et non agricoles)
1	14,155	12,433	12,146	11,072	9,637

5	30,680	26,946	26,324	23,997	20,887
6	33,303	29,248	28,573	26,047	22,672
7 et plus	35,818	31,460	30,734	28,017	24,385

Sources de revenu

On a demandé à toutes les personnes de 15 ans ou plus de déclarer leur revenu total en espèces tiré des sources suivantes au cours de l'année civile 1990.

a) Salaires et traitements

Salaires et traitements bruts avant les retenues pour l'impôt sur le revenu, les pensions, l'assurance-chômage, etc. Sont compris les soldes et les indemnités militaires, les pourboires, les commissions, les gratifications et les gains provenant de tout genre d'emploi occasionnel réalisés durant l'année civile 1990. Est exclue la valeur des allocations et avantages imposables fournis gratuitement par l'employeur tels que le logement ou l'utilisation d'un véhicule automobile.

b) Revenu net dans une entreprise non agricole non constituée en société et/ou dans l'exercice d'une profession

Revenu net (recettes brutes moins les dépenses d'exploitation, telles que les salaires, les loyers et l'amortissement) provenant de l'exploitation d'une entreprise non agricole non constituée en société ou dans l'exercice d'une profession pour son propre compte, durant l'année civile 1990. Dans le cas d'une association, le recensé devait déclarer seulement sa propre part du revenu. Sont inclus le revenu net des personnes qui gardent des enfants à leur propre domicile, celui des exploitants d'entreprises de distribution directe, par exemple pour la vente et la livraison de produits de beauté, ainsi que le revenu que les artistes, les écrivains, les professeurs de musique, les coiffeurs et coiffeuses, les couturiers et couturières tirent de leurs activités autonomes.

c) Revenu net provenant d'un travail autonome agricole

Revenu net (recettes brutes provenant de la vente de produits agricoles, moins l'amortissement et les frais d'exploitation) tiré de l'exploitation d'une ferme, pour son propre compte ou en association, durant l'année civile 1990. Dans le cas d'une association, le recensé devait déclarer seulement sa propre part du revenu. Sont inclus dans le revenu net les subventions, les paiements supplémentaires ou les paiements anticipés versés aux agriculteurs par les administrations fédérale et provinciales. Par contre, la valeur du revenu en nature, comme les produits agricoles cultivés et consommés à la ferme, n'est pas incluse.

d) Pension de sécurité de la vieillesse et supplément de revenu garanti

Pensions de sécurité de la vieillesse et suppléments de revenu garanti versés, par l'administration fédérale seulement, aux personnes âgées de 65 ans et plus et aux conjoints de 60 à 64 ans des bénéficiaires de prestations de sécurité de la vieillesse, durant l'année civile 1990. Sont incluses les allocations au conjoint survivant versées aux veufs et aux veuves âgés de 60 à 64 ans.

e) Prestations du Régime de rentes du Québec ou du Régime de pensions du Canada

Prestations reçues au cours de l'année civile 1990 en vertu du Régime de rentes du Québec ou du Régime de pensions

du Canada, par exemple les pensions de retraite, les prestations de survivant et les pensions d'invalidité. Sont exclues les prestations de décès versées sous forme forfaitaire.

f) Allocations familiales

Allocations versées durant l'année civile 1990 par les administrations fédérale et provinciales pour les enfants à charge de moins de 18 ans. Pour les résidents du Québec, les «allocations pour les enfants de moins de 6 ans» et les «allocations à la naissance» sont comprises. Le montant de ces allocations n'a pas été déclaré directement par le répondant; il a été calculé et inclus dans le revenu d'un des parents.

g) Crédits d'impôt fédéral pour enfants

Crédits d'impôt pour enfants accordés par l'administration fédérale pendant l'année civile 1990 pour les enfants à charge âgés de moins de 18 ans. Le montant de ces crédits n'a pas été déclaré directement par le répondant; il a été calculé et inclus dans le revenu d'un des parents.

h) Prestations d'assurance-chômage

Total des prestations d'assurance-chômage reçues au cours de l'année civile 1990, avant les retenues d'impôt sur le revenu. Sont incluses les prestations de maladie, de maternité, de pêcheurs, de travail partagé, de recyclage et de retraite reçues en vertu du programme fédéral d'assurance-chômage.

i) Autre revenu provenant de sources publiques

Tous les transferts, à l'exclusion de ceux qui sont compris dans une source de revenu distincte (allocations familiales, crédits d'impôt fédéral pour enfants, pensions de sécurité de la vieillesse et suppléments de revenu garanti, prestations du Régime de rentes du Québec ou du Régime de pensions du Canada et prestations d'assurance-chômage), reçus des administrations fédérale, provinciales et municipales durant l'année civile 1990. Cette source comprend les paiements d'aide sociale versés aux personnes nécessiteuses comme les mères ayant des enfants à charge, les personnes inaptes au travail de façon temporaire ou permanente, les personnes âgées, les aveugles et les personnes ayant une incapacité. Sont également inclus les suppléments de revenu versés par les administrations provinciales aux personnes âgées, qui s'ajoutent à la pension de sécurité de la vieillesse et au supplément de revenu garanti, ainsi que les subventions versées aux personnes âgées par l'administration provinciale pour compenser les frais de logement. Sont aussi inclus d'autres paiements de transfert, par exemple les prestations reçues en vertu du Programme de la planification d'emploi, les pensions et allocations aux anciens combattants, les pensions aux veuves et aux personnes à charge des anciens combattants et les indemnités d'accidents du travail. Enfin, sont aussi inclus tous les montants reçus en 1990 pour les crédits d'impôt remboursables par les provinces, le crédit pour la taxe fédérale sur les ventes et le crédit pour la taxe fédérale sur les produits et services.

j) Dividendes et intérêts d'obligations, de dépôts et de certificats d'épargne et autre revenu de placements

Intérêts perçus durant l'année civile 1990 au chapitre des dépôts dans des caisses populaires, des banques, des sociétés fiduciaires, des coopératives, des caisses d'épargne et de crédit, etc., et intérêts des certificats d'épargne, des obligations garanties et non garanties ainsi que tous les dividendes de sources canadiennes et étrangères. Comprend également les autres revenus de placements provenant de sources canadiennes ou étrangères tels que les revenus nets provenant d'une propriété, les intérêts sur prêts et hypothèques, le revenu régulier provenant d'une succession ou d'un fonds de fiducie et les intérêts sur polices d'assurance.

k) Pensions de retraite et rentes

Tout revenu ordinaire reçu durant l'année civile 1990 à la suite d'une participation à un régime de retraite d'un ou de plusieurs employeurs. Sont inclus les paiements reçus de toutes les rentes, y compris les paiements reçus en vertu d'un régime enregistré d'épargne-retraite (REÉR) venu à échéance et perçus sous forme de rente viagère, de rente à échéance fixe, d'un fonds enregistré de revenu de retraite ou d'un contrat de rente à versements invariables; les pensions versées aux veuves ou à d'autres parents de pensionnés décédés; les pensions des fonctionnaires et des membres des Forces armées ou d'officiers de la Gendarmerie royale du Canada (GRC) à la retraite; les rentes du Fonds des rentes du gouvernement canadien, d'une compagnie d'assurance, etc. Sont exclus les prestations de décès sous forme forfaitaire, les prestations et les retraits globaux d'un régime de pensions ou d'un REÉR ou les remboursements de cotisations payées en trop.

l) Autre revenu en espèces

Revenu ordinaire reçu durant l'année civile 1990 qui n'a pas été déclaré dans l'une des neuf autres sources indiquées sur le questionnaire, par exemple, pension alimentaire, soutien d'un enfant, soutien périodique reçu de personnes non membres du ménage, revenu net provenant de chambreurs et de pensionnaires, revenu reçu de l'étranger (sauf les dividendes et intérêts), bourses d'études non remboursables, indemnités de cessation d'emploi, redevances et indemnités de grève.

Recettes non comptées comme revenu

Le concept de revenu exclut les gains et les pertes au jeu, les sommes forfaitaires reçues en héritage au cours de l'année, les gains et les pertes en capital, le produit de la vente d'une propriété ou de biens personnels, les remboursements d'impôt sur le revenu, les paiements de prêt reçus ou remboursés, les règlements monétaires forfaitaires d'assurance, les remboursements d'impôt foncier et autres taxes, les remboursements de cotisations à un régime de pensions ainsi que les revenus en nature tels que les repas et l'hébergement gratuits ou les produits agricoles cultivés et consommés à la ferme.

Revenu total

Le revenu total est la somme des montants reçus par une personne en 1990, provenant des sources de revenu susmentionnées.

Structure de la famille de recensement

Classement des familles de recensement en familles époux-épouse (avec ou sans enfants présents) et en familles monoparentales selon le sexe du parent. Les familles époux-épouse peuvent également être désagrégées en «couples actuellement mariés» et «couples en union libre».

Structure de la famille économique

Classement des familles économiques en familles économiques époux-épouse et en familles économiques autres que les familles époux-épouse.

Familles économiques époux-épouse – Familles dont un des conjoints, soit l'époux, soit l'épouse, est la personne repère de la famille économique.

Familles économiques autres que les familles époux-épouse – Familles monoparentales dont le père ou la mère, selon le cas, est la personne repère de la famille économique, ou familles où une personne hors famille de recensement est la personne repère de la famille économique.

Territoire

Il s'agit de deux grandes divisions politiques du Canada, soit le Territoire du Yukon et les Territoires du Nord-Ouest. Du point de vue statistique, ces territoires sont l'équivalent des provinces, c'est-à-dire une unité de base pour laquelle des données sont totalisées et recoupées.

Travail

Nombre de semaines au cours desquelles les personnes ont travaillé durant l'année de référence (l'année précédant l'année du recensement), à plein temps ou à temps partiel. Les individus qui ont travaillé de 49 à 52 semaines, surtout à plein temps, sont classés comme étant travailleurs à plein temps toute l'année.

Qualité des données

Généralités

Le recensement de 1991 a été une entreprise complexe et de grande envergure. Bien que l'on ait déployé des efforts considérables pour assurer le respect des normes élevées tout au cours des opérations de la collecte et du traitement, il est inévitable que les estimations résultantes soient entachées d'erreurs. Il faut que les utilisateurs des données du recensement sachent que ces erreurs existent et qu'ils aient une idée générale de ses principales composantes afin d'être en mesure de déterminer si les données produites peuvent leur être utiles et d'évaluer les risques auxquels ils s'exposent en tirant des conclusions ou en prenant des décisions à partir de ces données.

Des erreurs peuvent se produire pratiquement à toutes les étapes du recensement, depuis la préparation des documents jusqu'au traitement des données, en passant par l'établissement des listes de logements et la collecte des données. Certaines

erreurs, qui surviennent plus ou moins au hasard, ont tendance à s'annuler lorsque les réponses fournies par les divers répondants sont agrégées pour un groupe assez important. Dans le cas des erreurs de cette nature, l'estimation correspondante sera d'autant plus précise que le groupe visé sera grand. C'est pourquoi on conseille aux utilisateurs de faire preuve de prudence lorsqu'ils utilisent des estimations relatives à de petits groupes. Toutefois, certaines erreurs peuvent survenir de façon plus systématique et introduire un «biais» dans les estimations. Comme ce biais persiste quelle que soit la taille du groupe pour lequel les réponses sont agrégées et comme il est particulièrement difficile d'en mesurer l'importance, les erreurs systématiques posent pour la plupart des utilisateurs de données des problèmes plus graves que les erreurs aléatoires mentionnées plus haut.

En ce qui concerne les données du recensement en général, les principaux types d'erreur sont les suivants :

- les **erreurs de couverture** qui se produisent lorsqu'on oublie des logements et/ou des personnes, qu'on les englobe à tort ou qu'on les compte deux fois;
- les **erreurs dues à la non-réponse** qui surviennent lorsque l'on n'a pu obtenir de réponses d'un petit nombre de ménages et/ou de personnes en raison d'une absence prolongée ou pour toute autre raison;
- les **erreurs de réponse** qui surviennent lorsque le répondant, ou parfois le recenseur, a mal interprété une question du recensement et a inscrit une mauvaise réponse;
- les **erreurs de traitement** qui peuvent se produire à diverses étapes, notamment au **codage**, lorsque les réponses en lettres sont converties en codes numériques; à la **saisie des données**, lorsque les préposés à l'entrée des données transfèrent sur bandes pour ordinateur les réponses figurant au questionnaire du recensement; à l'**imputation**, lorsqu'une réponse «valide», mais pas nécessairement exacte, est insérée dans un enregistrement par l'ordinateur pour remplacer une réponse manquante ou «invalide» («valides» et «invalides» renvoient à la cohérence de la réponse, compte tenu des autres renseignements compris dans l'enregistrement);
- les **erreurs d'échantillonnage** qui s'appliquent uniquement aux questions supplémentaires figurant dans le questionnaire complet distribué à un échantillon de un cinquième des ménages; elles résultent du fait que les réponses à ces questions, une fois pondérées pour représenter l'ensemble de la population, diffèrent inévitablement des résultats que l'on aurait obtenus si l'on avait posé ces questions à tous les ménages.

Les types d'erreur mentionnés plus haut ont tous une composante aléatoire et une composante systématique. Toutefois, la composante systématique de l'erreur d'échantillonnage est d'ordinaire très petite comparativement à sa composante aléatoire. Dans le cas des autres erreurs non dues à l'échantillonnage, tant la composante aléatoire que la composante systématique peuvent être importantes.

Erreurs de couverture

Les erreurs de couverture ont une incidence directe sur la précision des chiffres du recensement, c'est-à-dire sur la taille des divers univers du recensement : la population, les familles, les ménages et les logements. Bien que des mesures aient été prises pour corriger certaines erreurs identifiables, les chiffres définitifs sont toujours entachés d'une certaine erreur découlant du fait que des personnes ou des logements ont été oubliés, englobés à tort dans le recensement ou comptés deux fois.

L'oubli de logements ou de personnes se traduit par un **sous-dénombrement**. Des logements peuvent être oubliés en raison d'une mauvaise interprétation des limites du secteur de dénombrement (SD), ou du fait qu'ils sont cachés ou semblent inhabitables. Des personnes peuvent être oubliées parce que leur logement est oublié ou classé comme inoccupé ou quand certains membres du ménage sont omis sur le questionnaire parce que le répondant a mal interprété les instructions concernant les personnes à inclure. Enfin, certaines personnes peuvent être oubliées parce qu'elles n'ont pas de domicile habituel et qu'elles n'ont pas passé la nuit du recensement dans un logement.

Le dénombrement à tort ou le double compte de logements ou de personnes se traduit par un **surdénombrement**. Il peut y avoir surdénombrement des logements lorsque des constructions impropres à l'habitation sont classées comme logements ou lorsque des unités d'habitation ne répondant pas à la définition du logement retenue pour les fins du recensement sont comptées séparément plutôt que d'être considérées comme faisant partie d'un logement plus grand. Il peut y avoir double compte des logements lorsqu'il existe, par exemple, une certaine ambiguïté au sujet des limites des SD. Les personnes peuvent être comptées deux fois parce que leur logement a été compté deux fois ou parce que les lignes directrices concernant les personnes à inscrire dans le questionnaire ont été mal interprétées. À l'occasion, il arrive qu'une personne ne faisant pas partie de l'univers du recensement, comme un résident étranger ou une personne fictive, soit dénombrée à tort. En moyenne, le surdénombrement est moins susceptible de se produire que le sous-dénombrement; les chiffres des logements et des personnes sont donc probablement légèrement sous-estimés.

En 1991, quatre études ont été entreprises afin d'évaluer les différents aspects de l'erreur de couverture. Premièrement, on a visité de nouveau un échantillon de logements classés comme inoccupés afin de vérifier s'ils étaient réellement inoccupés le jour du recensement. Les chiffres définitifs du recensement ont ensuite été corrigés pour tenir compte des personnes ou des ménages oubliés parce que leur logement a été classé par erreur comme inoccupé. Deuxièmement, on a prélevé un échantillon de personnes dénombrées comme résidents temporaires afin de vérifier si elles avaient ou non été dénombrées à leur domicile habituel. À partir de cet échantillon, on a établi des estimations du nombre de personnes oubliées parce qu'elles étaient temporairement absentes de leur domicile habituel, puis on a rectifié les chiffres définitifs de population en conséquence. Malgré ces rectifications, les chiffres définitifs sont encore sujets à un certain sous-dénombrement. Une troisième étude, connue sous le nom de contre-vérification des dossiers, est réalisée pour déterminer l'importance de ce sous-dénombrement

résiduel, pour le Canada dans son ensemble ainsi que pour chaque province et territoire, à l'occasion du recensement de 1991. Le sous-dénombrement tend à être plus élevé pour certains segments de la population comme les jeunes adultes de sexe masculin et les personnes récemment immigrées. La quatrième étude, connue sous le nom d'étude du surdénombrement, a pour objet d'étudier les erreurs de surdénombrement. Ensemble, les résultats de la contre-vérification des dossiers et de l'étude du surdénombrement fournissent une estimation du sous-dénombrement net.

Autres erreurs non dues à l'échantillonnage

Alors que les erreurs de couverture ont une incidence sur le nombre d'unités comprises dans les divers univers du recensement, les autres erreurs influent sur les chiffres relatifs aux caractéristiques de ces unités.

Il est parfois impossible d'obtenir une réponse complète d'un ménage, même si le logement a été classé comme étant occupé et un questionnaire a été livré. Il se peut que les membres du ménage aient été absents pendant toute la période du recensement ou, en de rares occasions, que le membre responsable du ménage ait refusé de remplir le questionnaire. Il arrive plus souvent que le questionnaire soit retourné, mais qu'il y manque des données à certaines questions ou pour certaines personnes. Des efforts considérables sont déployés afin d'obtenir une réponse la plus complète possible. Les recenseurs contrôlent les questionnaires et assurent un suivi à l'égard de l'information manquante. Le travail du recenseur est ensuite vérifié tant par un surveillant que par un technicien du contrôle qualitatif. Malgré tout, il existe toujours un petit nombre de réponses manquantes à la fin de l'étape de la collecte. Bien que les entrées manquantes soient éliminées en cours de traitement en remplaçant chaque valeur manquante par la valeur correspondante figurant dans un enregistrement «similaire», il est possible que certaines **erreurs de non-réponse** s'y glissent. Cela est particulièrement grave lorsque les personnes non répondantes diffèrent des répondants sous certains aspects; en effet, cette procédure se traduira par l'introduction d'un **biais de non-réponse**.

Même lorsqu'une réponse est obtenue, il se peut qu'elle ne soit pas tout à fait exacte. Il est possible que le répondant ait mal interprété la question ou ait donné une réponse au jugé, surtout lorsqu'il répondait pour le compte d'un autre membre du ménage, qui était peut-être absent. Ces erreurs sont désignées sous le nom d'**erreurs de réponse**. Bien que ces erreurs surviennent d'ordinaire du fait que les répondants aient fourni des renseignements inexacts, elles peuvent aussi résulter d'erreurs commises par les recenseurs en remplissant certaines parties du questionnaire, comme le type de construction résidentielle, ou au moment du rappel effectué pour obtenir une réponse manquante.

Certaines questions du questionnaire du recensement nécessitent une réponse en lettres. Pendant le traitement, on attribue un code numérique à ces réponses. Il est possible que des **erreurs de codage** surviennent, surtout lorsque la liste de codes est longue (comme dans le cas de la langue, de l'origine ethnique, de l'industrie et de la profession) et que la réponse écrite est ambiguë, incomplète ou difficile à lire. On limite le

nombre d'erreurs de codage, sans toutefois l'éliminer complètement, en vérifiant un échantillon des codes et en prenant des mesures correctives au besoin. Pour la première fois en 1991, une grande partie des tâches de codage ont été automatisées afin, entre autres, de réduire le nombre d'erreurs de codage.

Les renseignements figurant dans les questionnaires sont introduits sur clavier dans un fichier informatique. Deux méthodes de résolution ordonnée sont utilisées pour limiter le nombre d'**erreurs à la saisie des données**. Dans un premier temps, certains contrôles (comme des vérifications d'étendue) sont effectués à mesure que les données sont entrées. Dans un second temps, on introduit de nouveau sur clavier un échantillon tiré de chaque lot de documents, puis on compare les entrées résultantes aux entrées initiales. Si le nombre d'erreurs relevées au sein des entrées initiales dépasse un seuil prédéterminé, on reprend l'introduction sur clavier des données de tout le lot de documents.

Une fois les données saisies, elles sont envoyées à Ottawa où elles sont soumises à une série de contrôles informatiques visant à relever les réponses manquantes ou incohérentes. Dans le cas des réponses incohérentes, il faut d'abord définir ce que l'on entend par une réponse invalide. Les réponses invalides ou manquantes doivent ensuite être remplacées par des réponses valides, c'est-à-dire par des réponses qui sont compatibles avec les autres données figurant dans l'enregistrement. Dans un petit nombre de cas, il est possible de déduire la réponse correcte à partir des autres données de l'enregistrement. Toutefois, dans la majorité des cas, cela est impossible et on obtient une réponse valide à partir d'un enregistrement «donneur» prélevé au hasard parmi un groupe d'enregistrements cohérents qui sont pour un certain nombre de caractéristiques connexes similaires à celles de l'enregistrement invalide. Bien sûr, rien ne garantit que la valeur imputée sera nécessairement identique à la réponse correcte pour la personne concernée. Cependant, pour autant que les enregistrements manquants ou invalides soient, en moyenne, similaires aux enregistrements valides, les **erreurs à l'imputation** s'annuleront plus ou moins une fois que les résultats auront été totalisés pour une région géographique ou un sous-groupe de population de taille suffisante.

Diverses études sont réalisées afin d'évaluer la qualité des réponses obtenues dans le cadre du recensement de 1991. Ainsi, on a calculé les taux de réponse et les taux de rejet au contrôle pour chaque question. Ces taux peuvent permettre de déterminer le potentiel de non-réponse et d'autres erreurs. De même, les totalisations établies à partir des données du recensement de 1991 ont été ou seront comparées avec les estimations correspondantes obtenues à partir des données des recensements précédents, des enquêtes-échantillon (comme l'Enquête sur la population active) et de divers dossiers administratifs (comme les registres des naissances et le cadastre municipal). Ces comparaisons peuvent permettre de cerner les problèmes de qualité éventuels ou, à tout le moins, de relever les divergences entre les sources.

Outre ces comparaisons entre données agrégées, certaines études de couplage de microdonnées sont actuellement menées afin de comparer les réponses de certains particuliers obtenues au recensement à celles d'une autre source de

renseignements. Pour un certain nombre de caractéristiques «stables» (comme l'âge, le sexe, la langue maternelle, le lieu de naissance), on compare les réponses obtenues auprès d'un échantillon de personnes à l'occasion du recensement de 1991 aux réponses obtenues des mêmes personnes à l'occasion du recensement de 1986. De même, à la suite du recensement de 1991, un échantillon de personnes ont été dénombrées de nouveau surtout pour déterminer les taux de surdénombrement. En même temps, cela a permis aux intervieweurs de poser une série de questions détaillées sur la langue, l'origine ethnique et l'état matrimonial; les réponses données à ces questions seront comparées aux réponses correspondantes du recensement afin de reconnaître les erreurs de réponse et tenter de les comprendre.

Erreurs d'échantillonnage

Les estimations obtenues en pondérant les réponses recueillies auprès d'un échantillon sont susceptibles d'être entachées d'erreurs en raison de la répartition des caractéristiques au sein de l'échantillon qui n'est généralement pas identique à la répartition correspondante au sein de la population dans laquelle l'échantillon a été prélevé.

L'erreur susceptible d'être introduite par l'échantillonnage variera en fonction de la rareté relative de la caractéristique étudiée au sein de la population. Lorsque la valeur contenue dans la case est élevée, cette erreur sera relativement faible proportionnellement à cette valeur. Lorsque la valeur contenue dans la case est faible, cette erreur sera relativement importante proportionnellement à cette valeur.

L'erreur susceptible d'être introduite par l'échantillonnage est d'ordinaire exprimée sous forme d'«erreur type». Il s'agit de la racine carrée de la moyenne, calculée pour l'ensemble des échantillons de même taille prélevés selon le même plan d'échantillonnage, des carrés de l'écart de l'estimation obtenue à partir de l'échantillon par rapport à la valeur pour l'ensemble de la population.

Le tableau ci-dessous fournit des mesures approximatives de l'erreur type due à l'échantillonnage. Ces mesures sont données uniquement à titre indicatif.

Tableau : Erreur type approximative introduite par l'échantillonnage pour les données-échantillon du recensement de 1991

Valeur contenue dans la case	Erreur type approximative
50 ou moins	15
100	20
200	30
500	45
1,000	65
2,000	90
5,000	140
10,000	200

20,000	280
50,000	450
100,000	630
500,000	1400

Les utilisateurs souhaitant déterminer l'erreur d'échantillonnage approximative pour une case de données dont la valeur a été obtenue à partir de l'échantillon de 20 % doivent choisir l'erreur type correspondant à l'entrée dans la colonne «Valeur contenue dans la case» ci-dessus qui se rapproche le plus de celle qui figure dans la case de données de la totalisation en cause. En utilisant la valeur ainsi obtenue pour l'erreur type, l'utilisateur peut, en général et à juste titre, être certain que la valeur réelle pour la population dénombrée (ne tenant pas compte des formes d'erreur autres que l'erreur d'échantillonnage) ne s'écarte pas de la valeur contenue dans la case dans une proportion supérieure ou inférieure à trois fois l'erreur type (p. ex., si la valeur contenue dans la case est 1,000, la fourchette à l'intérieur de laquelle se situe la valeur réelle serait de $1,000 \pm 3 \times 65$ ou de $1,000 \pm 195$).

Les erreurs types données dans le tableau ci-dessus ne s'appliquent pas aux *totaux* ou aux *totaux partiels* relatifs à la population ou aux univers (personnes, ménages, logements ou familles) pour la région géographique étudiée (voir Échantillonnage et pondération). On peut déterminer l'effet de l'échantillonnage pour ces valeurs en les comparant à celles des publications correspondantes contenant des données intégrales.

Il est à noter que l'effet du plan d'échantillonnage et de la méthode de pondération utilisés dans le cadre du recensement de 1991 variera d'une caractéristique à l'autre et d'une région géographique à l'autre. Il est donc possible que les valeurs de l'erreur type données dans le tableau ci-dessus sous-estiment ou surestiment l'erreur attribuable à l'échantillonnage.

Pour obtenir de plus amples renseignements sur la qualité des données du recensement, communiquer avec la Division des méthodes d'enquêtes sociales, Statistique Canada, Ottawa, Canada K1A 0T6, (613) 951-6940.

Confidentialité et arrondissement aléatoire

Afin de protéger le caractère confidentiel des renseignements fournis, les chiffres indiqués aux tableaux ont fait l'objet d'un **arrondissement aléatoire** qui supprime toute possibilité d'associer des données statistiques à une personne facilement reconnaissable. Selon cette méthode, tous les chiffres, y compris les totaux, sont arrondis de façon aléatoire (vers le haut ou vers le bas) jusqu'à un multiple de 5 et dans certains cas, de 10. Cette technique assure une protection efficace contre la divulgation sans ajouter d'erreur significative dans les données du recensement. Cependant, elle entraîne certaines conséquences pour les utilisateurs. Comme les totaux sont arrondis séparément, ils ne correspondent pas nécessairement à la somme des chiffres arrondis séparément dans les répartitions. De plus, il faut s'attendre à ce que les totaux et les autres chiffres correspondants dans diverses totalisations du recensement présentent quelques légères différences. De

même, la somme des pourcentages, qui sont calculés à partir de chiffres arrondis, ne correspond pas forcément à 100. Les répartitions en pourcentage et les taux sont dans la plupart des cas basés sur des données arrondies, alors que les variations en pourcentage et les moyennes sont basées sur des données non arrondies. La distorsion importante pouvant résulter de l'arrondissement aléatoire dans le cas des cases de faible valeur mérite aussi d'être signalée. Cette distorsion peut entraîner une perte de précision pour les cases de données renfermant des chiffres peu élevés.

Les utilisateurs devraient, lors de l'agrégation des données arrondies, être conscients de cette distorsion. Les erreurs dues à l'arrondissement ont tendance à s'annuler lorsque les chiffres contenus dans les cases sont agrégés de nouveau. Cependant, il est possible de réduire les distorsions en intégrant dans la mesure du possible les totaux partiels appropriés dans les totalisations.

Les utilisateurs désirant obtenir un maximum de précision peuvent aussi choisir de demander des totalisations personnalisées. Dans le cas de produits personnalisés, l'agrégation se fait à partir des enregistrements dans la base de données du recensement se rapportant aux particuliers. L'arrondissement aléatoire a lieu uniquement après que les cases de données ont été agrégées, ce qui réduit la distorsion au minimum.

Outre l'arrondissement aléatoire, on a adopté d'autres techniques, comme la **suppression des régions**, afin d'assurer encore mieux la confidentialité des réponses des particuliers.

Dans le cadre de la **suppression des régions**, toutes les données caractéristiques se rapportant aux régions géographiques dont la population est inférieure à une taille donnée sont supprimées. L'importance de la suppression est fonction des facteurs suivants :

- si les données sont totalisées à partir d'une base de données intégrales, la suppression est fondée sur la population totale;
- si les données sont totalisées à partir d'une base de données-échantillon, la suppression est fondée sur la population excluant les pensionnaires d'établissements institutionnels;
- si les données renferment une répartition du revenu, on supprime les données relatives aux régions dont la population est inférieure à 250 personnes;
- si les données ne renferment **aucune** répartition du revenu, on supprime les données relatives aux régions dont la population est inférieure à 40 personnes.

Dans tous les cas, les données supprimées sont incluses dans les totaux ou totaux partiels du niveau d'agrégation supérieur approprié.

Cette technique est appliquée à tous les produits renfermant des données infraprovinciales (c.-à-d. la série des Profils, les tableaux sommaires de base, les produits personnalisés et semi-personnalisés), qu'il s'agisse de données intégrales ou de données-échantillon.

Échantillonnage et pondération

Les données du recensement de 1991 sont soit des données intégrales (c.-à-d. recueillies auprès de l'ensemble des ménages), soit des données-échantillon (c.-à-d. recueillies auprès d'un échantillon aléatoire de ménages) que l'on a pondérées pour obtenir des estimations pour l'ensemble de la population. Les données du présent rapport ont été recueillies auprès d'un échantillon de 20 % et pondérées pour compenser pour l'échantillonnage. Tous les en-têtes de tableaux sont annotés en conséquence. On notera que, dans la plupart des réserves indiennes et les régions éloignées, toutes les données ont été recueillies auprès de l'ensemble de la population.

Il est possible que, pour une région géographique donnée, le total ou le total partiel pondéré de la population, des ménages, des logements ou des familles diffère du chiffre correspondant figurant dans les publications contenant des données intégrales. Ces variations (en plus de l'effet de l'arrondissement aléatoire) sont attribuables à l'échantillonnage.

Notes spéciales

Chiffres de population basés sur la résidence habituelle

Les chiffres de population présentés ici pour les différentes régions géographiques indiquent le nombre de Canadiens qui y ont leur lieu habituel de résidence, sans égard au lieu où ils se trouvaient le jour du recensement. Sont également comptés les Canadiens séjournant dans un logement de la région en cause le jour du recensement et n'ayant pas de lieu habituel de résidence ailleurs au Canada, de même que ceux qui sont considérés comme des «résidents non permanents» (voir le nota au sujet de ce groupe). Dans la plupart des régions, il n'y a guère de différence entre le nombre de résidents habituels et le nombre de personnes séjournant dans la région le jour du recensement. Toutefois, dans certains endroits, comme les lieux de villégiature et les régions où sont situés des camps de chantier importants, la différence entre ces deux chiffres peut être importante.

Réserves indiennes et établissements indiens partiellement dénombrés

Lors du recensement de 1991, le dénombrement n'a pas été autorisé sur certaines réserves indiennes et établissements indiens ou a été interrompu avant d'être mené à terme. De plus, certaines réserves indiennes et établissements indiens ont été dénombrés tardivement ou la qualité des données recueillies a été jugée insuffisante. Ces régions géographiques (un total de 78) sont appelées réserves indiennes et établissements indiens partiellement dénombrés.

Les données de 1991 ne sont pas disponibles pour les réserves indiennes et les établissements indiens partiellement dénombrés et ne sont pas comprises dans les totalisations. Les données sur les régions géographiques ayant une ou plusieurs de ces réserves ou établissements font donc l'objet d'un nota approprié. En raison des données manquantes, les utilisateurs doivent prendre note que les comparaisons (p. ex., des

variations en pourcentage) entre 1986 et 1991 ne sont pas exactes pour les régions géographiques en cause. L'effet des données manquantes est très faible pour les régions géographiques de niveau plus élevé (Canada, provinces, régions métropolitaines de recensement et agglomérations de recensement) mais peut être plus important pour les petites régions où les réserves et établissements indiens en cause représentent une proportion plus grande de la population.

Une liste des réserves indiennes et établissements indiens partiellement dénombrés en cause ainsi que les chiffres de la population et des logements privés occupés des deux derniers recensements (si les données sont disponibles) a été dressée et est présentée à l'annexe 1.

Résidents non permanents

Pour la première fois en 1991, le recensement de la population inclut à la fois les résidents permanents et les résidents non permanents. Les résidents non permanents comprennent les titulaires d'un permis de séjour pour étudiants, d'un permis de travail, d'un permis ministériel et les revendicateurs du statut de réfugié.

Lors des recensements antérieurs, seuls les résidents permanents du Canada étaient inclus dans le recensement (exception faite pour 1941). Les résidents non permanents étaient considérés comme des résidents étrangers et n'étaient pas dénombrés.

Présentement au Canada, les résidents non permanents forment un segment croissant de la population. Leur présence peut avoir une influence sur la demande de services gouvernementaux tels que les soins de santé, l'éducation et les programmes d'emploi. L'inclusion des résidents non permanents au recensement de 1991 facilitera aussi la comparaison avec les statistiques provinciales et territoriales (mariages, divorces, naissances et décès) qui incluent cette population. En outre, la définition du recensement permet maintenant de mieux refléter la recommandation des Nations Unies, à savoir que les résidents à long terme (personnes demeurant dans un pays pour un an ou plus) soient dénombrés.

Le total des chiffres de population, de même que ceux de toutes les variables du questionnaire, seront touchés par ce changement à l'univers du recensement de 1991. D'après les résultats du recensement de 1991, il y avait 223 410 résidents non permanents au Canada, ce qui représente un peu moins de 1 % de la population totale. Les utilisateurs doivent faire preuve d'une très grande prudence lorsqu'ils comparent des données de 1991 avec celles de recensements antérieurs pour des régions géographiques où la concentration de résidents non permanents est importante. Celles-ci comprennent les principales régions métropolitaines de l'Ontario, de la Colombie-Britannique et du Québec. La répartition de la population des résidents non permanents pour les provinces, les territoires et les régions métropolitaines de recensement est présentée à l'annexe 2.

Même si tous les efforts possibles ont été déployés pour dénombrer les résidents non permanents, le dénombrement de cette population n'est pas aussi complet que celui des résidents permanents. Des facteurs tels que les problèmes linguistiques et la réticence à remplir un formulaire du gouvernement ou de

comprendre l'utilité de leur participation peuvent avoir influé sur le dénombrement des résidents non permanents et s'être traduits par un sous-dénombrement.

Comparaisons des revenus estimatifs aux chiffres tirés des comptes nationaux et de l'enquête sur les finances des consommateurs

On a évalué les estimations du recensement sur le revenu en les comparant aux estimations du revenu des particuliers qui avaient été calculées aux fins des comptes nationaux. Après avoir ajustés les estimations sur le revenu des particuliers pour tenir compte des concepts et du champ d'observation, on a constaté que, dans l'ensemble, les estimations du recensement sur le revenu agrégé en 1990 provenant de sources comparables étaient à plus de 92 % des estimations similaires des comptes nationaux. Les estimations du recensement sur certaines composantes du revenu sont plus comparables que d'autres. Les estimations du revenu d'emploi au recensement diffèrent des estimations des comptes nationaux par environ 1 %. Les estimations du recensement sur les pensions de sécurité de la vieillesse, sur les allocations familiales et sur les crédits d'impôt pour enfants sont très près des estimations semblables des comptes nationaux, mais les estimations des prestations au Régime de rentes du Québec ou au Régime de pensions du Canada et des prestations d'assurance-chômage sont inférieures de 13 % environ. Les estimations du recensement sur les autres transferts gouvernementaux et les revenus de placements semblent être sujettes à une sous-estimation plus importante.

Les statistiques du recensement sur le revenu ont également été comparées à des statistiques similaires tirées de l'Enquête sur les finances des consommateurs, qui a lieu annuellement. Dans l'ensemble, les résultats ont été très satisfaisants. Les écarts observés entre les deux sources de données sur le revenu ont été imputés principalement aux erreurs d'estimation et à des variations au niveau de la couverture des univers.

Pour plus de détails, voir : Rapport technique du recensement de 1991 sur le revenu, n° 92-340F au catalogue.

Autres produits connexes

La gamme de produits du recensement de 1991 est conçue pour satisfaire les divers besoins de nos utilisateurs. Nous offrons une grande diversité de produits et services du recensement de la population de 1991. Ils sont divisés en cinq catégories.

- (1) Les **produits de référence** sont conçus pour faciliter l'utilisation des produits et des services; ils aident les utilisateurs à reconnaître leurs besoins, à trouver et à interpréter les données.
- (2) Les **produits de données** offrent un vaste éventail de données du recensement pour les régions géographiques normalisées sur les caractéristiques sociales, culturelles et économiques des Canadiens.
- (3) Les **produits analytiques** sont des publications qui expliquent les données du recensement de 1991 sur un grand nombre de thèmes ou de sujets, dont les résultats sont présentés dans un style facile à comprendre.
- (4) Le **service des totalisations** établit des totalisations pour les utilisateurs qui veulent des données sous une forme plus détaillée ou plus précise que ce que l'on trouve dans les publications normalisées.
- (5) On offre des **ateliers et des séminaires** aux nouveaux utilisateurs et aux utilisateurs actuels pour les informer sur les données du recensement et pour les aider à en tirer le maximum en fonction de leurs besoins.

Pour de plus amples renseignements sur les produits et services du recensement offerts, consultez le **Catalogue du recensement de 1991**, n° 92-302F au catalogue. Vous pouvez également contacter le centre régional de consultation le plus près indiqué à la section «Pour renseignements» de la présente publication.

Vous trouverez ci-après une liste d'autres produits ayant une présentation et un contenu semblables à cette publication. (**Nota** : Les publications ne sont pas toutes en vente. Il est toutefois possible de les consulter dans les centres régionaux de consultation ou les bibliothèques de dépôt.)

Publications du recensement de 1986 sur le revenu

93-114	Revenu total des particuliers
93-115	Revenu d'emploi des particuliers
93-116	Revenu d'emploi selon la profession
93-117	Revenu de la famille : familles de recensement
93-118	Revenu de la famille : familles économiques
93-119	Revenu du ménage : ménages privés

Produit de référence – Recensement de 1986

Non catalogué : Guide à l'intention des utilisateurs de données du recensement de 1986 sur le revenu

Produits analytiques – Recensement de 1986

98-128	Le revenu de la famille Le Canada à l'étude
98-129	Revenu d'emploi Le Canada à l'étude

Autres produits du recensement de 1986

En plus des publications mentionnées ci-dessus, un vaste éventail de données sur le revenu du recensement de 1986 sont aussi disponibles. On les retrouve en divers détails, pour différentes régions géographiques, sous d'autres formats. Pour plus de détails, veuillez consulter «**Produits et services**», n° 99-103E ou 99-103F au catalogue.

Produits de données – Recensement de 1991

93-331	Certaines statistiques du revenu Le pays
Cette publication inclut la répartition de la taille du revenu pour les individus, les familles de recensement et les ménages privés. De plus, la publication contient des statistiques sur les familles et les personnes à faible revenu.	

93-332	Revenu d'emploi selon la profession Le pays
94-310	Tendances au niveau du revenu, 1970-1990 Dimensions
94-315	Profil du revenu des particuliers Dimensions
94-316	Profil du revenu des familles et des ménages Dimensions
94-317	Caractéristiques de la population et des familles à faible revenu Dimensions
94-322	Personnes à revenu très élevé et à revenu très faible Dimensions
P9101	Nombre, agrégat et moyenne du revenu total et du revenu d'emploi en 1990 de la population de 15 ans et plus selon le sexe Tableaux sommaires de base
P9102	Population de 15 ans et plus selon le sexe et les tranches de revenu en 1990 Tableaux sommaires de base
P9103	Familles de recensement dans les ménages privés selon les tranches de revenu de la famille en 1990 Tableaux sommaires de base
P9104	Ménages privés selon les tranches de revenu du ménage en 1990 Tableaux sommaires de base

Produit de référence – Recensement de 1991

92-340F	Revenu Rapports techniques du recensement de 1991
---------	--

Produits analytiques – Recensement de 1991

96-317F	Gains des canadiens Le Canada à l'étude
96-318F	Revenu de la famille au Canada Le Canada à l'étude

En plus des produits mentionnés, certaines données sur le revenu, incluant l'incidence de faible revenu, ont été produites dans la série **Profils** pour la population, les familles de recensement et les ménages privés dans les circonscriptions électorales fédérales, les régions métropolitaines de recensement, les divisions et subdivisions du recensement et dans d'autres régions géographiques normalisées.

Centres régionaux de consultation

Les centres régionaux de consultation de Statistique Canada offrent une gamme complète des produits et services du recensement. On y trouve une bibliothèque et un comptoir de vente où les utilisateurs peuvent consulter ou acheter les différents produits, dont les publications, les disquettes de micro-ordinateurs, les microfiches et les cartes.

Le personnel des centres régionaux de consultation fournit des services de consultation et de recherche en plus du service après-vente, y compris des séminaires et des ateliers sur l'utilisation des données de Statistique Canada.

Chaque centre vous offre la possibilité d'extraire de l'information des systèmes d'extraction des données informatisés CANSIM et E-STAT de Statistique Canada. Un service de renseignements téléphonique est également disponible; ce service est gratuit pour les utilisateurs se trouvant à l'extérieur des secteurs d'appels locaux. Téléphonnez, écrivez, télécopiez ou visitez le centre régional de consultation le plus près pour de plus amples renseignements.

Autres références et services

Vous pouvez vous procurer les publications de Statistique Canada dans les centres régionaux de consultation et dans les bibliothèques de dépôt, ou vous pouvez également les commander par l'entremise de votre **librairie** ou de votre **agent d'abonnement**. Pour obtenir une liste des points de vente au Canada, communiquez avec le centre régional de consultation le plus près, ou consultez le Catalogue du recensement de 1991 (n° 92-302F au catalogue).

Les distributeurs secondaires présentent à leurs clients des possibilités d'accès aux données et un soutien aux analyses grâce à une diversité de services de consultation et de services informatisés que n'offre pas Statistique Canada. Vous pouvez obtenir les noms et adresses des distributeurs autorisés dans un centre régional de consultation.

Statistique Canada offre des **produits géographiques numériques** qui permettent la manipulation informatique des données géographiques. Un service d'extraction des données personnalisé permet aux utilisateurs de délimiter eux-mêmes, s'ils le désirent, la région géographique qu'ils veulent étudier. La gamme de fichiers d'extraction des données et de services offre une grande flexibilité dans la sélection d'une base géographique.

Vous trouverez dans le Catalogue du recensement de 1991 (n° 92-302F au catalogue), la description complète des fichiers numériques et des services.

On peut obtenir des renseignements sur **les produits et services du recensement de l'agriculture** en consultant la publication Produits et services du recensement de l'agriculture de 1991, n° 92-303 au catalogue, ou en téléphonant sans frais au 1-800-465-1991.

Les utilisateurs qui ont besoin de données spéciales peuvent demander les **services des enquêtes postcensitaires**. Les données sont présentées sur disquettes pour micro-ordinateur pouvant être utilisées avec un programme de calcul de tableaux financiers ou sur support papier. Pour de plus amples renseignements, communiquez avec le centre régional de consultation le plus près.

La Division de la diffusion informatique des données (DDID) est responsable du CANSIM qui consiste en un réseau de bases de données informatisées et un service d'extraction des données de Statistique Canada. Les utilisateurs ont accès aux statistiques actuelles et historiques de diverses façons, notamment grâce aux progiciels spécialisés de manipulation et d'analyse des données, aux ressources graphiques et au service de recherche bibliographique. Pour de plus amples renseignements sur le CANSIM, communiquez avec un centre régional de consultation.

Notes, Footnotes and Abbreviations

Note(s)

Comparison of the 1991 Census data with data from earlier censuses is affected by a change in the definition of the 1991 Census population. Persons in Canada on student authorizations, employment authorizations, Minister's permits, and as refugee claimants were enumerated in the 1991 Census but not in previous censuses. These persons are referred to as non-permanent residents. For further information, see the "Special Notes" section.

.. Figures not available.

... Figures not appropriate or not applicable.

– Nil or zero.

XXX Figures suppressed to protect confidentiality.

† Excludes Census data for one or more incompletely enumerated Indian reserves or Indian settlements. For further information, see the "Special Notes" section.

¶ Incompletely enumerated Indian reserve or Indian settlement. For further information, see the "Special Notes" section.

- Tables 1 to 8:
For the 1985 income distribution in constant (1990) dollars, the 1985 values were revised upwards by the change in the consumer price index between 1985 and 1990.

- Table 9:
See text for universe covered and definition of concepts, terms and variables.

- Medians have been calculated from unpublished distributions.

Footnote(s)

(1) Includes loss.

(2) For persons with income.

(3) For persons with employment income.

(4) See definition section under "Marital Status".

(5) Worked 49-52 weeks in the reference year, mostly full time.

(6) For persons with wages and salaries.

Abbreviation(s)

Not applicable.

Nota, Renvois et Abréviations

Nota

La comparaison des données du recensement de 1991 avec celles des recensements précédents est affectée par la modification apportée à la définition de la population du recensement de 1991. Les titulaires d'un permis de séjour pour étudiants, d'un permis de travail, d'un permis ministériel et les revendicateurs du statut de réfugié ont été dénombrés au recensement de 1991, mais ne l'ont pas été aux recensements antérieurs. Ces personnes sont des résidents non permanents. Pour plus de renseignements, voir la section «Notes spéciales».

.. Nombres non disponibles.

... N'ayant pas lieu de figurer.

– Néant ou zéro.

XXX Nombres supprimés afin de protéger la confidentialité.

† Ne comprend pas les données du recensement pour une ou plusieurs réserves indiennes ou établissements indiens partiellement dénombrés. Pour plus de renseignements, voir la section «Notes spéciales».

¶ Réserve indienne ou établissement indien partiellement dénombré. Pour plus de renseignements, voir la section «Notes spéciales».

- Tableaux 1 à 8 :
La répartition du revenu de 1985 a été exprimée en dollars constants de 1990 en rectifiant, à la hausse, les valeurs de 1985 d'après les variations prises en compte par l'indice des prix à la consommation entre 1985 and 1990.

- Tableau 9 :
Voir le texte pour l'univers compris et la définition des concepts, termes et variables.

- Les médianes ont été calculées d'après des répartitions non publiées.

Renvoi(s)

(1) Comprend les pertes.

(2) S'applique aux personnes ayant un revenu.

(3) S'applique aux personnes ayant un revenu d'emploi.

(4) Voir la section des définitions sous «État matrimonial».

(5) A travaillé 49-52 semaines durant l'année de référence, surtout à plein temps.

(6) S'applique aux personnes ayant des salaires et traitements.

Abréviation(s)

Sans objet.

Invest in Information

Earnings and incomes of individuals, families and households from the 1991 and earlier censuses can give you the edge you need for successful decision-making.

Investissez dans l'information

Les gains et le revenu des particuliers, des familles et des ménages, données tirées du Recensement de 1991 et de recensements antérieurs, pourraient vous aider à trancher judicieusement vos décisions.
